

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 055735	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED 12/04/2025
NAME OF PROVIDER OR SUPPLIER Delta Oaks Post Acute		STREET ADDRESS, CITY, STATE, ZIP CODE 6940 Pacific Avenue Stockton, CA 95207	

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0814</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Dispose of garbage and refuse properly.</p> <p>Based on observation, interview, and record review, the facility failed to ensure garbage and refuse was properly disposed of when 1 of 2 outside garbage dumpster lids were observed not adequately closed for a census of 112. This failure had the potential to expose the residents' environment to pests, odors, or diseases. Findings: During a concurrent observation and interview on 12/4/25 at 10:24 AM with the Central Supply (CS) in the outside dumpster area of the facility, a garbage dumpster was observed to have a lid open. The CS confirmed that the garbage dumpster's lid was open. During a concurrent observation and interview on 12/4/25 at 11:30 AM with Director of Staff Development (DSD) and Infection Preventionist (IP) in the outside dumpster area of the facility, a garbage dumpster was observed to have a lid open. The DSD and IP both confirmed that the garbage dumpster's lid was open. During an interview on 12/4/25 at 1:30 PM with the IP, the IP stated that the outside garbage dumpster lids should have both been closed when not in use. The IP also stated the purpose of keeping the garbage dumpster lids closed was to prevent infection from spreading. The IP further stated that pests could gather and potentially enter the facility. During an interview on 12/4/25 at 1:40 PM with the DSD, the DSD stated that garbage dumpster lids should have been closed. The DSD also stated that flies or other insects could fly out of the dumpsters if they are not closed. The DSD further stated that it was important to keep the dumpster lids closed to prevent injuries to the staff at the facility. During an interview on 12/4/25 at 1:50 PM with the Director of Nursing (DON), the DON stated the garbage dumpsters lids should have been closed. The DON also stated that the chances of cross-contamination and infection are increased by leaving the dumpster lids open. The DON further stated that bugs, flies, gnats (a common name for many small, two-winged flies, some of which bite and some of which don't. This term is often used to describe various types of tiny flies, including fruit flies, fungus gnats, and drain flies, and they are found in moist environments), and other insects could enter the facility. The DON expressed that the staff could be impacted as well because they would not be aware of the various germs entering the facility which would increase the chances of infection spreading. During a review of the facility's policy and procedure (P&P) titled, Food-Related Garbage and Refuse Disposal, revised 10/2017, the P&P indicated, "All garbage and refuse containers are provided with tight-fitting lids or covers and must be kept covered when stored or not in continuous use. Outside dumpsters provided by garbage pickup services will be kept closed and free of surrounding litter. During a review of the facility's P&P titled, Policies and Procedures - Infection Prevention and Control, revised 12/2023, the P&P indicated, "The facility adopted infection prevention and control policies and procedures are intended to help maintain a safe, sanitary, and comfortable environment and to help prevent and manage transmission of diseases and infections.</p>

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
