For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0689</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>Ensure that a nursing home area is free from accident hazards and provides adequate supervision to prevent accidents.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 40702</p> <p>Based on records reviewed and interviews, for one of three sampled residents, (Resident #1) who had an allergy to shellfish, the facility failed to ensure his/her environment was free of hazards, when on 09/12/24, Resident #1 was served a meal that consisted of seafood (which included shrimp), Resident #1 consumed the meal, developed signs and symptoms of an allergic reaction, including shortness of breath (SOB), puffy watery eyes and flushed appearance, he/she developed stridor (abnormal, high-pitched respiratory sound produced by irregular airflow in a narrowed airway), 911 was called, and Resident #1 was transported to the Hospital Emergency Department (ED) for evaluation of anaphylaxis (a severe, potentially life-threatening allergic reaction) where he/she was admitted for further treatment.</p> <p>Findings Include:</p> <p>Review of the Facility's Policy titled Food Allergies and Intolerances, dated as revised August 2017, indicated the following:</p> <ul style="list-style-type: none"> -residents with food allergies and/or intolerances are identified upon admission and offered food substitutions of similar appeal and nutritional values; steps are taken to prevent resident exposure to the allergen(s) -food allergies are immune system responses to allergens (foods) -severe food allergies are noted on the face of the chart indicating severe food allergy: (name of food) and communicated in writing directly to the dietician and the director of food and nutrition services -meals for residents with severe food allergies are specially prepared so that cross-contamination with allergens does not occur -residents with food intolerances and allergies are offered appropriate substitutions for foods that they cannot eat -nursing staff and food service employees are trained in the signs and symptoms of allergic reactions to foods and basic first aid measures in the event of a food allergy emergency <p>(continued on next page)</p>

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0689</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>Review of Resident #1's Hospital Discharge Summary, dated 09/16/24, indicated that Resident #1 presented (on 9/12/24) with anaphylaxis (severe, potentially life threatening allergic reaction) due to shrimp exposure (shellfish allergy) and he/she received an EpiPen (epinephrine) injection, Prednisone 60 milligrams (mg) and Benadryl 50 mg in the field. The Summary indicated upon his/her arrival to the emergency room , he/she was tachycardic (fast heart rate over 100 beats a minute) requiring 6 Liters (L) of oxygen, and he/she was treated with additional Epinephrine 0.3 mg, Pepcid 20 mg, and Solumedrol (corticosteroid) 80 mg.</p> <p>The Summary further indicated Resident #1 reported that he/she was eating dinner which included shrimp, causing him/her to have a sudden, severe onset of difficulty breathing and he/she experienced a tightening sensation in his/her throat.</p> <p>During an interview on 10/09/24 at 12:36 P.M., Resident #1 said at dinner time (exact date unknown) someone had given him/her food that had shrimp on it and said he/she ate the shrimp because that is what he/she was given. Resident #1 said shortly after eating the shrimp, he/she could not breathe and was gasping for air. Resident #1 said he/she put his/her call light on, one of the Certified Nurse Aides (CNA's) came to his/her room, he/she told her that he/she did not feel good and was having trouble breathing. Resident #1 said it was because he/she was having an allergic reaction to the shrimp. Resident #1 said it was awful and said he/she only remembered hearing someone say we are going to use an EpiPen on you.</p> <p>Review of the Facility's Dietary Menu, dated 09/12/24, indicated the following two meals were on the menu to be served for dinner:</p> <ul style="list-style-type: none"> -Pasta and Krab Salad Plate and Chefs Breadbasket -Italian Sub Sandwich with Pasta Salad <p>However, further review of the Facility's Dietary Substitution List, indicated that on 09/12/24, Seafood [NAME] was substituted for the Krab and Pasta Salad dinner meal.</p> <p>During an interview on 10/09/24 at 1:44 P.M., the Assistant Food Service Director (AFSD) said on 09/12/24 Seafood [NAME] was substituted for the pasta and Krab salad dinner meal. The AFSD said Seafood [NAME] consisted of crab, shrimp, and fish in a white cream sauce over pasta.</p> <p>Review of Resident #1's Nurse Progress Note, dated 09/12/24, (written by Nursing Supervisor), indicated that Resident #1 presented with acute shortness of breath (SOB), puffy watery eyes and he/she was flushed appearing with acute hypoxia (low level of oxygen in the blood). The Note indicated there was a suspicion Resident #1 had an allergy to shrimp (per him/her) and he/she was given an EpiPen injection, along with 60 mg of Prednisone and Benadryl. The Note indicated Resident #1 was observed having stridor with deteriorating breathing, 911 was called, and he/she was transferred to the Hospital Emergency Department (ED).</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0689</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>During an interview on 10/10/24 at 12:18 P.M., (which included review of her written witness statement), Certified Nurse Aide (CNA) #1 said on 09/12/24 at dinner time Nurse #1 checked Resident #1's meal tray to make sure the food was appropriate and handed it to her. CNA #1 said she brought Resident #1's meal tray to him/her, set up his/her meal and left the room. CNA #1 said Resident #1's meal was pasta with white sauce, but said she did not know and could remember if there was seafood (shrimp) on top of the pasta. CNA #1 said about 45 minutes later Resident #1 put his/her call light on, she went to answer it and Resident #1 told her he/she did not feel good and to call the nurse please. CNA #1 said she told Nurse #1 right away that Resident #1 was not feeling good.</p> <p>During an interview on 10/10/24 at 11:27 A.M., (which included review of her written witness statement), Nurse #1 said the nurses check all resident's meal trays for correct diet order and any allergies before they are given to a resident. Nurse #1 said when she checked Resident #1's meal tray there was pasta with a white gravy sauce. Nurse #1 said she did not remember what other food was on the pasta, said it was not meat (beef) and that she could not recall seeing any seafood.</p> <p>Nurse #1 said after checking Resident #1's meal tray she put his/her tray back into the food truck. Nurse #1 said about 45 minutes later CNA #1 told her that Resident #1 was having trouble breathing and she immediately went to his/her room. Nurse #1 said Resident #1 was SOB, was having trouble breathing and she informed the Nursing Supervisor.</p> <p>Nurse #1 said she was not aware that Resident #1 had a shellfish allergy because when she checked his/her meal tray, that she had not looked at his/her diet slip for allergies, but said she should have.</p> <p>Review of Resident #1's Dinner meal diet slip, dated 09/12/24, indicated that he/she had an allergy to shellfish.</p> <p>During an interview on 10/09/24 at 2:10 P.M., the Nursing Supervisor said Nurse #1 informed him that Resident #1 complained of being SOB and he immediately went to Resident #1's room. The Supervisor said Resident #1's face looked puffy, flushed and his/her eyes were watery and that it looked like he/she was having an allergic reaction to something. The Supervisor said he asked Resident #1 if he/she was allergic to anything and said Resident #1 told him that he/she was allergic to shrimp and might have eaten some. The Supervisor said he notified Resident #1's Physician and received orders to administer an EpiPen injection, Prednisone, and Benadryl STAT and continue to monitor Resident #1 for stridor.</p> <p>The Supervisor said after administering the medications, Resident #1 continued to be monitored, his/her breathing becoming worse, and that he/she developed stridor. The Supervisor said 911 was called and Resident #1 was transferred to the Hospital ED for evaluation.</p> <p>During a telephone interview on 10/15/24 at 12:34 P.M., the Director of Nursing (DON) said upon admission to the Facility, they were aware that Resident #1 had an allergy to shellfish. The DON said she was notified on 09/12/24 that Resident #1 was sent to the Hospital due to possibly being exposed to seafood. The DON said she did an investigation and said Resident #1 had been exposed to shellfish, that she was not sure how it happened, but added that the kitchen must have sent the wrong meal tray.</p> <p>(continued on next page)</p>

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.			
(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0689</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>The DON said she expected all nurses to check residents' meal trays, compare it with the resident's diet order slip and allergies listed on a resident meal slip to ensure that residents are receiving the correct meal, prior to receiving their tray. The DON said if a resident's diet slip does not match what is on the meal tray, the tray should be removed immediately from the food truck and the nurse should call the kitchen to request a meal tray with an appropriate meal for the resident.</p> <p>On 09/16/24, the Facility was found to be in Past Non-Compliance and presented the Surveyor with a plan of correction which addressed the area(s) of concern as evidenced by:</p> <p>A. On 09/16/24, Resident #1 returned to the Facility with a new order for epinephrine PRN (as necessary).</p> <p>B. On 09/16/24, the Assistant Director of Nursing conducted a house wide audit on all residents with food allergies, resident's allergies were compared with dietary tray cards, Physician orders were reviewed for residents with food allergies and for PRN orders for EpiPen and Benadryl.</p> <p>C. On 09/12/24 and 09/13/24, the Director of Nursing and Nursing Supervisor provided education to all Licensed Nursing Staff on checking meal trays prior to passing which included: to check meal tray and meal ticket to ensure it matches Physicians' and diet orders in point Click Care (PCC), to check allergies on the meal tickets to ensure that resident is receiving the right tray, and CNA's are not to open the meal truck unless a nurse is present.</p> <p>D. On 09/13/24 and 09/16/24, the Assistant Food Service Director provided education to all Dietary Staff on allergy awareness, meal ticket reading, residents allergies and tray ticket accuracy.</p> <p>E. All new resident admissions and re-admissions done by the admitting Nurse, the Nurse will review resident's food allergies and ensure residents have a Physician order for PRN Epinephrine.</p> <p>F. The Unit Managers will review and update all resident's allergies during quarterly care plan meetings and as needed.</p> <p>G. The Director of Nurses and/or designee and Assistant Food Service Director will conduct random audits to ensure residents with food allergies receive the correct diet meal two times weekly for four weeks, then weekly for four weeks and then monthly for one month.</p> <p>H. The Director of Nursing and/or designee are responsible for audit results and the findings of the audits will be reviewed at the monthly QAPI meeting until compliance is achieved.</p> <p>I. The Director of Nurses and/or designee are responsible for overall compliance.</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0806</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>During an interview on 10/10/24 at 10:07 A.M., Dietary Aide #2 said he worked 4:00 P.M. to 8:00 P.M. on 09/12/24 and called out all residents dinner diet orders to the Cook. Dietary Aide #2 said when he does the calling out in the tray line, he reads the residents diet order and any allergies off to the [NAME] and said the [NAME] then puts the food on the plate, the plate is then placed on the resident's tray and put into the food truck. Dietary Aide #2 said he could not remember anything about a resident receiving the wrong meal that day.</p> <p>During an interview on 10/10/24 at 1:51 P.M., the [NAME] said there is a tray line and one of the Dietary Aides is the caller. The [NAME] said the caller reads the diet slip (which includes the resident's diet and any allergies) to the cook who then puts the meal on the plate, the caller then takes the plate, places it on the resident's tray and into the food truck. The [NAME] said the dinner menu on 09/12/24 was Pasta and Krab Salad but it was substituted with Seafood [NAME] which comes pre-made with crabmeat, shrimp, and scallops in a white cream sauce, that was then put on top of the pasta. The [NAME] said that he did not put any fish in the [NAME] that night.</p> <p>The [NAME] said Dietary Aide #2 called out the resident's dinner diet slips to him on 09/12/24. The [NAME] said he really did not know how Resident #1 received the wrong meal, but it happened and said that most likely the caller (Dietary Aide #2) did not call out his/her allergies to him (the Cook) that night. The [NAME] said he relies on the Dietary Aide that is calling out the resident's diet slips because he cannot see what is on the diet slips when he is preparing the meal.</p> <p>During an interview on 10/09/24 at 11:52 A.M., the Food Service Director (FSD) said all diet slips indicate a resident's diet order, allergies, and dislikes. The FSD said a Dietary Aide calls out the resident's diet and any allergies to the Cook, the [NAME] prepares the meal plate, and the plate is handed to the caller (Dietary Aide) who is then supposed to verify the resident's diet, cover the meal and it is placed on the food truck. The FSD said he expects all dietary staff to follow proper procedure for calling and preparing the correct meal tray (according to dietary orders and allergies) for all residents before the plated meal is placed on their trays and into the food truck.</p> <p>During an interview on 10/10/24 at 11:27 A.M., (which included review of her written witness statement), Nurse #1 said nurses check all resident's meal trays for correct diet order and any allergies before they are given to a resident. Nurse #1 said when she checked Resident #1's meal tray there was pasta with a white gravy sauce. Nurse #1 she did not remember what other food was on the pasta, but said it was not meat (beef) and that she could not recall seeing any seafood. Nurse #1 said after checking Resident #1's meal tray she put his/her tray back into the food truck.</p> <p>Nurse #1 said about 45 minutes later CNA #1 told her that Resident #1 was having trouble breathing and she immediately went to his/her room. Nurse #1 said Resident #1 was SOB, was having trouble breathing and she informed the Nursing Supervisor. Nurse #1 said she was not aware that Resident #1 had a shellfish allergy because when she checked his/her meal tray she had not looked at his/her diet slip for allergies, but said she should have.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0806</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Few</p>	<p>Review of Resident #1's Hospital Discharge Summary, dated 09/16/24, indicated that (on 9/12/24) Resident #1 presented with anaphylaxis (a severe, potentially life-threatening allergic reaction) due to shrimp exposure (shellfish allergy) and he/she received EpiPen injection, Prednisone 60 milligrams (mg) and Benadryl 50 mg, in the field. The Summary indicated upon his/her arrival to the emergency room , Resident #1 was tachycardic requiring 6 Liters (L) of oxygen, and he/she was treated with additional Epinephrine 0.3 mg, Pepcid 20 mg, and Solumedrol (corticosteroid) 80 mg. The Summary further indicated Resident #1 reported that he/she was eating dinner which included shrimp, causing him/her to have a sudden, severe onset of difficulty breathing and he/she experienced a tightening sensation in his/her throat.</p> <p>During a telephone interview on 10/15/24 at 12:34 P.M., the Director of Nursing (DON) said Resident #1 had an allergy to shellfish and she was notified on 09/12/24 that Resident #1 was sent to the Hospital due to possibly being exposed to seafood. The DON said she did an investigation and said Resident #1 had been exposed to shellfish, was not sure how it happened, but that the kitchen must have sent the wrong meal tray.</p> <p>On 09/16/24, the Facility was found to be in Past Non-Compliance and presented the Surveyor with a plan of correction which addressed the area(s) of concern as evidenced by:</p> <p>A. On 09/16/24, Resident #1 returned to the Facility with a new order for epinephrine PRN (as necessary).</p> <p>B. On 09/16/24, the Assistant Director of Nursing conducted a house wide audit on all residents with food allergies, resident's allergies were compared with dietary tray cards, Physician orders were reviewed for residents with food allergies and for PRN orders for EpiPen and Benadryl.</p> <p>C. On 09/12/24 and 09/13/24, the Director of Nursing and Nursing Supervisor provided education to all Licensed Nursing Staff on checking meal trays prior to passing which included: to check meal tray and meal ticket to ensure it matches Physician and diet orders in point Click Care (PCC), to check allergies on the meal tickets to ensure that resident is receiving the right tray, and CNA's are not to open the meal truck unless a nurse is present.</p> <p>D. On 09/13/24 and 09/16/24, the Assistant Food Service Director provided education to all Dietary Staff on allergy awareness, meal ticket reading, residents allergies and tray ticket accuracy.</p> <p>E. All new resident admissions and re-admissions done by the admitting Nurse, the Nurse will review resident's food allergies and ensure residents have a Physician order for PRN Epinephrine.</p> <p>F. The Unit Managers will review and update all resident's allergies during quarterly care plan meetings and as needed.</p> <p>G. The Director of Nurses and/or designee and Assistant Food Service Director will conduct random audits to ensure residents with food allergies receive the correct diet meal two times weekly for four weeks, then weekly for four weeks and then monthly for one month.</p> <p>H. The Director of Nursing and/or designee are responsible for audit results and the findings of the audits will be reviewed at the monthly QAPI meeting until compliance is achieved.</p> <p>(continued on next page)</p>
