Further review of the MDS indicated that he/she was dependent on staff for Activities of Daily Living (ADLs- an individual's daily self-care activities).</p> <p>On 8/1/24 at 9:09 A.M., the surveyor observed Resident #21 sitting in a tilt and space (allows the seated person to maintain the correct posture while being tilted so pressure is distributed evenly across the body) wheelchair in the day room. The surveyor observed that Resident #21's wheelchair had areas that were covered in food debris, the left arm pad was worn enough to view the exposed padding underneath, the right-side pad next to his/her leg was torn exposing a large area of blue foam and the footrest extender was ripped with exposed white padding.</p> <p>On 8/5/24 at 8:14 A.M., the surveyor observed Resident #21 sitting in a tilt and space wheelchair in the day room. The surveyor observed that Resident #21 was sitting in the wheelchair that still had areas covered in food debris, the left arm pad with the exposed padding underneath, the right-side pad that was torn and exposing a large area of blue foam next to his/her leg and the footrest extender that was ripped with exposed white padding.</p> <p>The facility was unable to provide a preventative maintenance policy or cleaning policy for wheelchairs when the surveyor requested this information. The facility was also unable to provide a routine maintenance schedule for wheelchairs during the duration of the recertification survey.</p> <p>During an interview on 8/5/24 at 8:16 A.M., Unit Manager (UM) #1 said that depending on the type of concern, the Rehabilitation or Maintenance staff will manage the repair of wheelchairs in the facility. UM #1 also said that staff are expected to report a wheelchair concern into an electronic work order computer system called Tels after they see it.</p> <p>(continued on next page)</p>
