NAME OF PROVIDER OR SUPPLIER  Brandon Nursing and Rehabilitation Center		STREET ADDRESS, CITY, STATE, ZIP CODE  355 Crossgate Blvd Brandon, MS 39042	

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0584</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>Honor the resident's right to a safe, clean, comfortable and homelike environment, including but not limited to receiving treatment and supports for daily living safely.</p> <p><b>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 42807</b></p> <p>Based on observation, interviews, and facility policy review, the facility failed to ensure a safe, clean homelike environment for two (2) of six (6) residents' rooms (Resident #3 and Resident #4), one (1) of three (3) shower rooms, and one (1) of three (3) hallways observed.</p> <p>Findings include:</p> <p>Review of the facility's policy Resident Room Cleaning with History Date 6/18 (June 2018) revealed, Responsibility: Housekeeping Staff. Procedure .6. Use .disinfectant on room surfaces .10. Clean window glass. 11. Spot clean walls/damp wipe vertical surfaces/counters/ledges/sills .16. Dust mop and damp mop floor .</p> <p>Review of the facility's policy, Shower Room Cleaning with History Date 6/18 (June 2018) revealed, Responsibility: Housekeeping Staff. Procedure .5. Disinfect vertical and horizontal surfaces. 6. Damp mop floor with disinfectant .</p> <p>Resident #3</p> <p>On 6/11/24 at 3:00 PM, observation and an interview with Resident #3 in in the resident's room revealed that the floor was dirty with several various items of trash and many stains on the floor. The windows were difficult to see through and appeared hazy; the windows were rough and dusty to touch. Dust was easily wiped from the windows with a paper towel and tap water; the area wiped with the wet paper towel was noticeably easier to see through in contrast to the rest of the windows. The windowsills of all three large windows which spanned one wall of the room were littered with trash and a black substance that wiped off easily with a wet paper towel. The floor beneath the bed and nightstand of Resident #3 was littered with bits of unrecognizable irregularly shaped bits of trash that ranged from dime sized to half dollar sized and dust that wiped from the floor easily with a wet paper towel. There was a pair of Resident #3's shoes under the air conditioner unit on the right side of the room beneath the window that were covered with dust. Resident #3 stated he did not know how long the shoes had been there and he confirmed that the shoes would need cleaning before he wore them due to a layer of dust on both shoes. There was a dark gray/black substance on the floor around the edge of the walls and in the corners at the entrance of the room along the walls of the bathroom and closet that wiped off easily with a wet paper towel. Resident #3 voiced disappointment in the quality of housekeeping services. He stated that he would prefer his room to be cleaner. The resident stated, They could definitely do better with housekeeping. Look at that floor. I can't do it.</p> <p>(continued on next page)</p>

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

<p>F 0584</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>On 6/11/24 at 4:33 PM, an interview with the Housekeeping Supervisor confirmed she had just been hired in the position and had two new housekeepers in orientation on 6/11/24. She confirmed that each resident's room was supposed to be dusted and swept and the floor cleaned daily. She stated that the windows and windowsills should be checked and cleaned daily or as needed. Regarding the windows and windowsills, she stated, they need to be cleaned. She confirmed that she could easily notice the difference in the window where the window had been wiped with wet paper towel. She stated she had not noticed the dust that covered the decorative items in the hallway outside Resident #3's room, but that they needed to be cleaned. She said she had noticed the hand sanitizer dispensers being dirty and that she had not had a chance to clean them but had already planned to address the cleaning of the dispensers.</p> <p>On 6/12/24 at 2:38 PM, during a telephone interview with a family member of Resident #3, they voiced concern related to the housekeeping services and the lack of cleanliness of the resident's room. They stated they visited every week, and the floor was always messy and dirty and that the surfaces in the room were always dusty.</p> <p>Record review of the Face Sheet for Resident #3, revealed the facility admitted the resident on 11/10/23 and the resident had diagnoses including Depression.</p> <p>Record review of the Quarterly Minimum Data Set (MDS) with an Assessment Reference Date (ARD) of 5/06/24 for Resident #3 revealed the resident had a Brief Interview for Mental Status (BIMS) score of 14, which indicated no cognitive impairment.</p> <p>Resident #4</p> <p>Record review of the Face Sheet for Resident #4, revealed the facility admitted the resident on 1/25/19 and the resident had diagnoses including Unspecified urinary incontinence.</p> <p>Record review of the Quarterly MDS with and ARD of 3/25/24 for Resident #4 revealed the resident had a BIMS score of 15, which indicated no cognitive impairment.</p> <p>On 6/11/24 at 2:00 PM, observation and an interview with Resident #4 revealed a strong urine odor in the hallway outside the resident's room. The odor was stronger in the resident's room. Resident #4 was resting in bed with the top sheet and blanket bundled in her arms. Resident #4 reported that she had an episode of bladder incontinence and was waiting for the Certified Nursing Assistant (CNA) to come change her and was trying to keep the flat sheet and blanket from getting wet.</p> <p>On 6/11/24 at 2:15 PM, an interview with CNA #1 revealed she was the CNA assigned to provide care for Resident #4 on 6/11/24. She confirmed that the room held the odor of urine which was notable in the hallway outside the resident's room.</p> <p>On 6/11/24 at 2:22 PM, observation and an interview with Registered Nurse (RN) #1 she confirmed that there was a strong urine odor inside and outside Resident #4's room.</p> <p>On 6/12/24 at 3:10 PM, observation and an interview with the Administrator he confirmed that there a strong urine odor inside and outside Resident #4's room. The Administrator stated that it was possible that the resident's mattress needed to be cleaned or replaced.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0584</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>Shower Room</p> <p>On 6/12/24 at 11:42 AM, observation and an interview with the Housekeeper on the back hall revealed the floor of the back hall shower room between the toilet and the door had six (6) scattered quarter to half dollar brown stains which wiped off readily with a wet paper towel. The Housekeeper reported that she was assigned to provide cleaning of the shower room which included the floor on 6/11/24 and 6/12/24. She stated she had not cleaned the floor of the shower room on 6/11/24 or 6/12/24. She confirmed that the shower room floor was dirty but said she did not know what the substance on the floor was. She stated that barriers to cleaning the shower room included being assigned to approximately thirty (30) resident rooms and not being able to clean the shower room during resident care (showers) or during mealtimes. She reported that no one had reported to her that the floor was dirty or in need of housekeeping attention.</p> <p>Hallway</p> <p>Observation revealed that on the wall in the hallway outside room [ROOM NUMBER] there was a two foot by two-foot (2' X 2') decorative wall art and a two-foot (2') wall mounted metal half vase filled with silk greenery. Both decorative pieces were covered by brownish gray dust as thick as two stacked quarters (approximately 3.5 millimeters) that were easily wiped/plucked in clumps from the items. There were nine (9) wall mounted hand sanitizer dispensers in the hallway outside the resident's room placed on both sides of the hallway between the nurse's station and the exit door. The tops of all dispensers were coated with gray substance and the floor and wall protector shields of each were discolored with a brownish gray substance not easily wiped away.</p> <p>On 6/12/24 at 3:00 PM an interview with the Administrator revealed he expected each resident and all common areas be provided with housekeeping services daily and as needed to provide a clean environment free of malodorous smells and that the facility housekeeping policies to be followed. He stated that there had been challenges with securing housekeeping staff and that it was an ongoing process of hiring, training and retaining housekeeping staff.</p>
