F 0695	Provide safe and appropriate respi	ratory care for a resident when needed	
Level of Harm - Minimal harm or potential for actual harm	**NOTE- TERMS IN BRACKETS H	IAVE BEEN EDITED TO PROTECT CO	ONFIDENTIALITY** 41951
Residents Affected - Some	Based on observation, interview, and record review, the facility failed to ensure the oxygen rate of delivery was included in the provider's oxygen orders for 4 (#s 3, 17, 78, and 129); failed to ensure a form of documentation was in place for when oxygen tubing was last changed for 5 (#s 3, 17, 21, 78, and 129); and failed to ensure proper infection control practices were adhered to for a respiratory nebulizer mask/mouthpiece for 1 (#17) of 17 sampled residents. These deficient practices had the potential to affect the correct rate of oxygen delivery and increase the risk for infections in residents with prescribed oxygen. Findings include:		
	1. Oxygen Orders		
	During an observation on 5/17/25 a cannula. The oxygen concentrator	at 3:02 p.m., resident #17 was lying in b was set at three liters per minute.	ed, receiving oxygen via nasal
		herapy orders, dated 4/7/25 at 5:02 p.r., Keep O2 Sat Above 90%. The provide	
		at 3:19 p.m., resident #78 was seated in trator was set at four liters per minute.	n his recliner, receiving oxygen via
	Review of resident #78's Other Nursing orders, dated 4/30/25 at 1:38 p.m., showed, RT/RN to determine oxygen supplementation to maintain oxygen saturation > 92%. Review of resident #78's Oxygen Therapy orders, dated 4/30/25 at 1:38 p.m., showed oxygen to be delivered continuous, via nasal cannula; and, Keep O2 Sat Above 90%. The two provider's orders were contradictory and neither order defined the oxygen rate of delivery.		
	During an observation on 5/17/25 a cannula. The oxygen concentrator	at 3:49 p.m., resident #129 was lying in was set at two liters per minute.	bed, receiving oxygen via nasal
		Therapy orders, dated 5/9/25 at 1:37 p ontinuous, via nasal cannula, Keep O2 ate of delivery.	
	During an observation on 5/18/25 a cannula.	at 8:35 a.m., resident #3 was lying in be	ed, receiving oxygen via nasal
	Review of resident #3's Oxygen Therapy orders, dated 4/28/25 at 4:54 p.m., showed oxygen to be delivered continuous, via nasal cannula; and, Keep O2 Sat Above 92%. The provider's order for oxygen did not includ a rate of delivery.

Staff member H was wearing a hairnet but did not have a beard net covering his facial hair.  During an interview on 5/19/25 at 9:04 a.m., staff member H stated he should have worn a beard net while he prepared trays in the kitchen area. Staff members E and F stated a hat or hairnet, and beard net, if indicated, must be worn to prepare food in the kitchen area.  Review of the facility's document titled, Food & Nutrition Services Dress Code, last revised 8/26/24, showed:  - Hair/Nails  - Generally, hair must be restrained in foodservice area's.  . If your hair is over 1/4 in length, you must wear one or a combination of the following:	Deficits Serior Services - Grandvic	5VV	1		
[Each deficiency must be preceded by full regulatory or LSC identifying information]  Procure food from sources approved or considered satisfactory and store, prepare, distribute and serve food in accordance with professional standards.  41951  Based on observation, interview, and record review, the facility failed to ensure staff member H adhered to sanitary hygiene practices, by wearing a beard net/covering while preparing residents' food trays in the kitchen area. This failure increased the risk of hair getting in food for any resident the employee was preparing food for, or from the area the employee was working in, when not wearing protective hair coverings. Findings include:  During an observation on 5/19/25 at 8:50 a.m., staff member H was preparing four individual residents' breakfast trays on the countertop located in the 500-hall kitchen area. Staff member H was wearing a hairnet but did not have a beard net covering his facial hair.  During an interview on 5/19/25 at 9:04 a.m., staff member H stated he should have worn a beard net while he prepared trays in the kitchen area. Staff members E and F stated a hat or hairnet, and beard net, if indicated, must be worn to prepare food in the kitchen area.
