(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)			
F 0657  Level of Harm - Minimal harm or potential for actual harm  Residents Affected - Few	Develop the complete care plan within 7 days of the comprehensive assessment; and prepared, reviewed, and revised by a team of health professionals.  "NOTE-TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY" Licensure Reference Number 175 NAC 12-006.09(F)(iii) Based on record review and interviews, the facility failed to complete the care plan (a comprehensive, written document that outlines the personalized healthcare needs, goals, and interventions for a resident, based on a thorough assessment of the medical, functional, and psychosocial status) and to conduct the interdisciplinary care conference on three residents (Resident 1, 21, and 46) out of three residents sampled. The facility census was 74. Findings are:  During an interview on 9/09/2025 at 2:15 PM the administrator confirmed the facility is behind on care plan conferences but the facility had an active Performance Improvement Plan (PIP) in place due to past non-compliance with the resident care conferences.  During an interview on 09/09/2025 at 3:54 PM the Social Services (SS) confirmed that the care conferences have been behind. The facility started a plan on 8/1/2025 to get the care conferences caught up.  A.  During an interview on 9/8/25 at 1:24 pm Resident 1 revealed that (gender) hasn't had a care plan conference for &Idquoquite a while".  Record review of Resident 1's facility's nursing assessments and progress notes for the last 6 months did not reveal any care plan meeting notes.  Record review of Resident 1's Quarterly Minimum Data Set (MDS –a comprehensive assessment of each resident\u00e4\u00e4 apus;s functional capabilities used to develop a resident\u00e4\u00e4 apus; splan of care) dated 8/20/2025 revealed that the resident admitted to the facility on (DATE), had a Brief Interview for Mental Status (BiMS - a test used to get a quick snapshot of a resident\u00e4\u00e4 review of non-15, the higher the score, the higher the cognitive function) score of 10, with a primary diagnosis of Multiple Scl			

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES  (Each deficiency must be preceded by full regulatory or LSC identifying information)		
F 0657  Level of Harm - Minimal harm or potential for actual harm	In an interview on 9/09/2025 at 4:30 PM with SS confirmed the care plans and conferences were still an issue and behind on completion. SS confirmed the PIP was not effective, and the facility will continue to work on the issue. SS confirmed the facility completed a Past Non-compliance plan on 6/1/2025 and there was no improvement with the process.		
Residents Affected - Few	In an interview on 9/10/2025 at 8:35 AM with SS, confirmed there is no current system for scheduling the care plan conferences, when the MDS is due, an invite is sent to the family. SS confirmed that this does not always happen timely.		
	In an interview on 9/10/2025 at 8:45 AM with MDS nurse, confirmed the facility use utilizes the MDS schedule in point click care (electronic documentation system) to trigger the care plan process. MDS nurse confirmed the care plan notice does not always get sent to the families timely and confirmed this was an issue. MDS nurse confirmed no awareness of the process that SS follows for the care plan process.		
	In an interview on 9/10/2025 at 11:26 AM Resident 46 confirmed no involvement with care plan meetings or being invited and unaware if their children were invited.		
	A record review of the SS's PIP initiated 8/1/2025 revealed an area of concern including timely completion of care plan conferences for residents in accordance with regulatory guidelines and facility policy. Components of the plan included:		
	Performance expectations:		
	Scheduled and conducted within required timeframes (quarterly, annually, upon significant change.		
	Documented accurately and completely in the resident's medical record.		
	Coordinated with interdisciplinary team members and family/responsible parties.		
	Compliance with Centers for Medicare and Medicaid services (CMS) regulations and state specific Long-Term Care (LTC)-requirements.		
	Observed performance issues in	cluded:	
	Multiple care conferences have be	en delayed or missed.	
	Lake of timely documentation follow	ving scheduled care conferences.	
	Inconsistent communication with families and team members regarding scheduling.		
	3. Impact of performance issues included:		
	Non-compliance with state and fed	eral regulations.	
	Potential negative impact on reside	ent care planning and outcomes.	
	Increased risk of citations during su	urveys.	
	(continued on next page)

#### SUMMARY STATEMENT OF DEFICIENCIES

(Each deficiency must be preceded by full regulatory or LSC identifying information)

F 0695

Level of Harm - Minimal harm or potential for actual harm

Residents Affected - Few

\*\*NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY\*\* The facility failed to ensure physician orders for CPAP ( Continuous Positive Airway Pressure) devices included the required pressure setting for Residents 53 and 60.F695 - Respiratory CareLicensure Reference Number: 175 NAC 12-006.09(H)(vi)(3)(g) Based on observation, interview, and record review the facility failed to ensure that physician orders for Continuous Positive Airway Pressure (CPAP) therapy (a type of non-invasive ventilator that delivers pressurized air through a mask to keep the airway open during sleep) included complete and specific settings (pressure, ramp time, humidity, or other specifications) for 2 of 2 sampled residents (Resident 53 and Resident 60) in a facility census of 74. This failure had the potential to result in inadequate or unsafe respiratory care delivery. A.A record review of resident 53's Care Plan (a detailed document that outlines the specific healthcare needs, goals and interventions for the resident) dated September 9, 2025 revealed an intervention listed as CPAP as ordered under the altered respiratory function focus. A record review of resident 53's Clinical Physician Orders dated September 10, 2025 revealed an active order for CPAP when sleeping - every night shift. No pressure, ramp time, or humidity settings were identified.A record review of resident 53's Minimum Data Set (MDS, a federally mandated clinical assessment of all residents in Medicare or Medicaid certified nursing homes) Quarterly assessment dated [DATE] revealed the resident was receiving a non-invasive mechanical ventilator (CPAP) as part of the treatment plan. A record review of resident 53's Medical Diagnosis report dated September 9, 2025 revealed active diagnoses of Chronic Respiratory Failure with Hypoxia (a condition in which the lungs cannot supply enough oxygen to the blood) and Obstructive Sleep Apnea (a sleep disorder where breathing repeatedly stops and starts due to airway blockage), conditions requiring CPAP therapy. A record review of the facility's policy dated November 18, 2024 revealed that implementation required verifying the practitioner's order including settings before initiating CPAP therapy. In an interview conducted with the DON (Director of Nursing, the licensed nurse responsible for oversight of nursing services) at 11:40 a.m. on September 10, 2025, confirmed that physician orders for the CPAP machines for Resident 53 and Resident 60 did not include specific settings or specifications. The DON confirmed that the physician orders were incomplete and should have included the CPAP settings. The DON confirmed that per home settings could not be identified by staff and that she did not know what per home settings meant.B.A record review of resident 60's Care Plan dated August 27, 2025 revealed interventions related to sleep apnea (a disorder in which breathing repeatedly stops and starts during sleep) with CPAP (Continuous Positive Airway Pressure, a type of non-invasive ventilator that delivers pressurized air through a mask to keep the airway open during sleep) use and Amyotrophic Lateral Sclerosis (ALS, a progressive neurodegenerative disease affecting nerve cells in the brain and spinal cord), including CPAP while sleeping at night.A record review resident 60's Clinical Physician Orders dated September 10, 2025 revealed an active order for new CPAP with current settings. No settings were documented. A record review of resident 60's Order Summary dated September 10, 2025 revealed an active order for CPAP at HS (hour of sleep) per home settings every evening and night shift. No settings were documented. A record review of resident 60's Minimum Data Set (MDS, a federally mandated clinical assessment of all residents in Medicare or Medicaid certified nursing homes) Comprehensive assessment dated [DATE] revealed CPAP documented under Section O as a non-invasive ventilator in use. A record review of the facility's policy dated November 18, 2024 revealed that implementation required verifying the practitioner's order including settings before initiating CPAP therapy. In an interview conducted with the DON (Director of Nursing, the licensed nurse responsible for oversight of nursing services) at 11:40 a.m. on September 10, 2025, confirmed that physician orders for the CPAP machines for Resident 53 and Resident 60 did not include specific settings or specifications. The DON confirmed that the physician orders were incomplete and should have included the CPAP settings. The DON confirmed that per home settings could not be identified by staff and that (gender) did not know what per home settings meant.
