(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0550 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Honor the resident's right to a dignified existence, self-determination, communication, and to exercise his or her rights. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on observation, interview, and record review, the facility failed to ensure staff spoke to Resident #41 respectfully using her preferred name. This affected one (Resident #41) of five residents reviewed for dignity. The facility census was 42.Findings include:Record review of Resident #41 revealed she was admitted [DATE] and had diagnoses including dementia, anxiety disorder, and chronic respiratory failure. Her Minimum Data Set (MDS) 3.0 assessment dated [DATE] revealed she had mild or no cognitive impairment.Observation of a video dated 01/22/26 revealed an unseen staff member call Resident #41 by her last name during care.Record review of emails sent by the daughter of Resident #41 to facility staff and the Ohio Department of Health revealed that the emails were directed to verified email addresses belonging to administrative staff. An email dated 02/09/26 stated that Certified Nurse Aide (CNA) #576 called Resident #41 by her last name only. The daughter indicated this was disrespectful, as she believed elders should not be addressed solely by their last name. A subsequent email dated 02/18/26 reported that an unidentified aide continued to address Resident #41 in the same manner. The emails also alleged that staff yelled at Resident #41 and spoke to her as if she were a child.Interview with Resident #41 on 04/19/26 at 10:08 A.M. revealed workers yelled at her often and some were ?very nasty.'Interview with the Administrator, Director of Nursing, Assistant Director of Nursing #563, and Regional Nurse #626 on 04/20/26 at 2:26 P.M. revealed they denied knowledge of the above-noted concerns with the resident being yelled at or of concerns for the resident not being called by her preferred name.Interview with Licensed Practical Nurse (LPN) #543 on 04/22/26 at 11:14 A.M. revealed she sometimes called Resident #41 by her last name and denied knowledge of this not being her preference.Interview with Certified Nursing Assistant (CNA) #576 on 04/22/26 at 1:56 P.M. revealed she called Resident #41 by her last name and denied knowledge of this not to being her preference. She denied ever mistreating or yelling at the resident.Interview with Regional Nurse #626 on 04/27/26 at 1:09 P.M. confirmed the video showed a staff member addressing Resident #41 by her last name.Interview with Resident #41 on 04/28/26 at 8:49 A.M. revealed she preferred to be called by her first name. She said staff sometimes called her by her last name, which she felt was rude and disrespectful.Record review of the resident concern log for the past year revealed no documented concerns regarding Resident #41.This deficiency represents noncompliance investigated under Master Complaint Number 2961312 and Complaint Numbers 2726820, 2623912, and 2606964.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0558 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Reasonably accommodate the needs and preferences of each resident. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on observation, record review, interviews and policy review, the facility failed to reasonably accommodate Resident #41's longstanding (since June 2024), care-planned preference to maintain an electronic monitoring device in her room. The facility failed to support continuation of the device in accordance with the residents' rights, preference and care plan. This affected one resident (41) of one reviewed for personal property. The facility census was 42.Findings include:Record review revealed Resident #41 was admitted to the facility on [DATE]. Resident #41 resided in a private room with no roommate. Review of a care plan dated 06/12/24 revealed the resident's preference to use electronic monitoring in her room. The care plan specifically instructed staff not to obstruct, tamper with, or destroy any recording devices. Review of a care conference note dated 12/02/25 revealed Admin discussed alternate placement with resident and POA. At this time facility cannot meet resident's needs and POA is non-compliant with camera policy. Facility will assist POA and resident with finding alternative placement. Daughter is excessive with emails (i.e sending at all hours i.e. 11:49 pm multiple times a day) encouraged daughter to go directly to nursing when she is in facility. The care conference notes failed to contain any additional information related to how the resident's daughter was non-compliant with the facility camera policy and/or any measures taken to ensure the resident's right to use an electronic monitoring device in her room was honored. A progress note dated 03/12/26 revealed the Administrator notified the resident's daughter on 03/09/26 the camera had been removed for noncompliance with policy, and the family retrieved the camera on 03/12/26. Information provided from Resident #41's daughter during the investigation revealed this camera was the third camera she had purchased for use in the facility since the resident's admission as the two prior camera devices had been damaged by facility staff. The daughter indicated this most recent camera (that had been removed by the Administrator on 03/09/26) had been in place since 06/26/25. During the onsite survey, the facility provided no documented evidence of any new or immediate safety risk justifying the abrupt removal of the camera, nor any written notice or progressive steps to warrant the removal of the device between 06/2025 and 03/2026). Observation of Resident #41's room on 04/19/26 at 10:06 A.M. revealed the resident had a posting on the door identifying there was electronic recording in the room.Interview with Resident #41 on 04/19/26 at 10:08 A.M. revealed she had a camera on the drawers at the foot of her bed until a few weeks ago, when staff removed it against her wishes. Observation revealed the resident had no obvious camera in the room, including on the drawers at the foot of her bed. Resident #41 was the only resident residing in the room.Interview with the Administrator on 04/19/26 at 4:56 P.M. revealed he removed Resident #41's camera because it violated facility policy, stating it could be remotely moved. The Administrator denied any Wi-Fi issues in Resident #41's room and explained the camera's noncompliance had been discussed with the family and ombudsman numerous times over the last year before the facility ultimately removed it. The Administrator maintained the camera was noncompliant due to its ability to pan and be remotely controlled and further stated the resident's daughter had spoken or yelled at staff through the cameraInterview with Ombudsman #700 on 04/20/26 at 1:16 P.M. revealed the facility reported Resident #41's camera could follow people when it moved around the room, but Resident #41's daughter said it did not do this. The facility communicated a new camera could be put in the room from a list they said they would provide the daughter; however, Ombudsman #700 was not sure if the list had been provided as of this date. Interview with Ombudsman Team Lead #701 on 04/20/26 at 1:44 P.M. revealed the family of Resident #41 wanted the previous camera (that had been removed by the Administrator on 03/09/26) back in the room as the daughter was refusing to pay for a fourth camera. The Ombudsman Team Lead revealed it was her understanding the facility justified the removal of the camera because the camera could move and because Resident #41's daughter spoke to staff through the camera.Interview with the Administrator, Director of Nursing, Assistant (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0558 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Director of Nursing #563, and Regional Nurse #626 on 04/20/26 at 2:26 P.M. verified the camera that had been in Resident #41's room since 06/2025 had been removed by the Administrator in 03/2026. The administrative staff revealed they had determined Resident #41's camera could pan the room, and they did not allow cameras that could do that. The Administrator removed the camera, and staff returned it to the family. The Administrator said the daughter could place a new camera in the room but needed to go through him first to ensure compliance with facility policy. He said the camera should have a fixed position, and the daughter should not be able to speak through it into the room.During an interview with Resident #41's daughter on 04/21/26 at 4:07 P.M. the daughter showed the surveyor the camera that had been removed from Resident #41's room. Observation of the camera revealed no evidence the camera had independent locomotion; however, it could rotate without direct physical manipulation. Resident #41's daughter showed the surveyor an app on her phone demonstrating the camera could be set to a fixed position. She said that Wi-Fi in the resident's room often went out, and when it did the camera reset its' settings, and she had to turn off its mobility again. The daughter reported she had numerous recorded incidents of staff yelling at or mistreating the resident and staff often blocking the camera by placing towels over it or standing directly in front of it that had been lost because the SD card from the camera was missing when the facility returned the device to her. During the interview, Resident #41's daughter revealed at the 08/28/25 care conference, she attempted to demonstrate the device's fixedˆposition capability, but she stated the Administrator refused to review it. She then shared she had sent emails to facility administrative staff explaining the camera's functionality and need to be reset after Wi-Fi outages to keep it in a fixed, which the facility failed to respond to. Resident #41's daughter revealed she stopped sending emails after a 12/02/25 care plan meeting because she stated during this meeting she was threatened with a 30-day discharge notice for sending excessive emails. Record review revealed the facility provided no documented evidence explaining the loss of the memory card or demonstrating attempts to investigate or recover the resident's memory card from the camera. Review of emails sent by Resident #41's daughter from [NAME] 2025 through March 2026 (including on 08/12/25, 10/02/25, 10/13/25, 11/15/25, 03/12/26, 03/17/26, and 03/25/26) to verified email addresses of facility staff revealed communication voicing concerns of persistent Wiˆ Fi failures within the facility causing the camera to reboot and rotate automatically. The emails noted the camera device was always set to a fixed position and never placed on motion tracking. The emails included repeated requests for maintenance intervention of the facility Wi-Fi system to address connectivity issues which had been ongoing (per the daughter) for over a year.Review of the facility's electronic monitoring policy revealed it required cameras to be fixedˆposition but contained no prohibition against twoˆway audio, despite the Administrator citing audio use as a reason for removal. This discrepancy demonstrated the facility relied on unwritten or inconsistently applied expectations when removing the resident's property.Review of the facility's concern log from March 2025 to March 2026 revealed no entries regarding camera compliance issues, despite the Administrator's assertion the matter had been discussed numerous times over the last year. The absence of such documentation beyond care conference minutes (from the meeting held on 12/02/25 which focused on the volume of the daughter's emails rather than any verified cameraˆrelated noncompliance and contained no evidence of progressive steps or efforts to reconcile the issue) contradicts the facility's claim of ongoing issues and undermines justification for immediate removal of the resident's property.This deficiency represents noncompliance investigated under Complaint Number 2804759 and Complaint Number 2726820.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0573 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Let each resident or the resident's legal representative access or purchase copies of all the resident's records. Based on record review, interviews, and facility policy review, the facility failed to ensure that a resident's medical records request was honored in accordance with policy. This failure affected one (Resident #41) of one resident reviewed for records requests. The facility census was 42Findings include:Record review showed that the daughter of Resident #41 sent emails on 03/15/26 and 04/25/26 to verified facility email addresses for the Assistant Director of Nursing (ADON) #563, Social Worker #574, and carbon copied (cc) the Long-Term Care Ombudsman requesting the resident's medical records. She also asked to be sent any required forms needed to complete the requestDuring interview on 04/27/26 at 1:47 P.M., ADON #563 confirmed these emails were sent but stated she did not recall seeing the records request.During a separate interview at the same time, Social Worker #574 reported that she began employment on 03/16/26, one day after the first email was sent. Although she used the same social worker email address to which the request was sent, she stated she did not review emails that predated her start date. She denied knowledge of any records request and said such requests would go through the AdministratorAn interview with the Administrator on 04/27/26 at 4:35 P.M. revealed he was not aware that Resident #41's family had made a records request, but he confirmed that an email dated 03/15/26 requesting records had been sent to facility management addressesReview of the facility's medical records release policy dated 06/01/24 revealed that all resident record requests must be referred to the Administrator. The policy directs the facility to review each request, verify the requesting party's access rights, request further information if needed, and notify the relevant office to ensure the request is completed.This deficiency represents noncompliance investigated under Complaint Number 2726820.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0584 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Honor the resident's right to a safe, clean, comfortable and homelike environment, including but not limited to receiving treatment and supports for daily living safely. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review and interview, the facility failed to uphold its responsibility to protect residents' rights to receive care in a manner that maintains their dignity, autonomy, and personal property. This affected one (Resident #41) of one resident reviewed for personal property. The facility census was 42.Findings include:Record review of Resident #41 revealed she was admitted [DATE] with diagnoses including dementia, anxiety disorder, and chronic respiratory failure. Her Minimum Data Set (MDS) 3.0 assessment dated [DATE] revealed she had mild or no cognitive impairment. Her progress notes revealed no documentation of any missing SD card, socks, or cord, or of any broken phones or cameras.Review of an email sent to the verified email address of the Director of Nursing (DON), Assistant Director of Nursing (ADON) #563 and Ohio Department of Health (ODH) email addresses by the daughter of Resident #41 on 03/19/26 revealed the daughter reported a set of cabin socks given as a Christmas present were stolen from her room on 03/17/26. She also said she previously reported two cameras, and a phone were broken by staff with no reimbursement.Review of an email sent to the verified email address of the ombudsman's office by the daughter of Resident #41 on 03/14/26 revealed she reported a missing camera and SD card.Review of an email from Regional Nurse #626 dated 04/21/26 revealed the facility did not have an inventory list for Resident #41's possessions.Review of the Ohio Department of Health Certification and Licensure website revealed no alleged misappropriation events were reported by the facility within the last six months.Interview with Resident #41 on 04/19/26 at 10:08 A.M. revealed she had cameras that were missing. She also said staff took the cord off her [NAME] music device last week and now it was unusable. She could not say if she notified the staff but said her daughter probably did so.Interview with Ombudsman #700 on 04/20/26 at 1:16 P.M. revealed her office was notified of a missing SD card for Resident #41's camera in March 2026. They went to the facility to follow up on the concern and staff denied knowledge of the missing SD card.Interview with the Administrator, DON, ADON #563, and Regional Nurse #626 on 04/20/26 at 2:26 P.M. revealed the Administrator removed the camera from Resident #41's room and said there was no SD card present at that time. He said staff had not been told of any missing items including a missing cord, socks, or SD card.Interview with Resident #41's daughter on 04/21/26 at 4:07 P.M. revealed she said staff removed a camera from the resident bedside and returned it to her without the SD card she purchased to store data in it. Staff had also broken two cameras since June 2026 and broke the resident's phone by dropping it.Interview with Regional Nurse #626 on 04/29/26 at 3:30 P.M. confirmed the facility did not have any recent ?soft file' documenting response to concerns for the family of Resident #41 which may not be logged in her official medical records.Record review of the resident concern log from March 2025 to March 2026 revealed no concerns related to Resident #41.This deficiency represents noncompliance investigated under Complaint Numbers 2726820, 2639150, 2623912, and 2606964.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0607 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Develop and implement policies and procedures to prevent abuse, neglect, and theft. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review, review of the Ohio Department of Health (ODH) Certification and Licensure website, facility policy review, and interviews, the facility failed to follow established policies for responding to allegations of abuse, neglect, and misappropriation. This affected one (Resident #41) of two residents reviewed for abuse. The facility census was 42.Findings include: Record review of Resident #41 revealed she was admitted [DATE] with diagnoses including dementia, anxiety disorder, and chronic respiratory failure. Her Minimum Data Set (MDS) 3.0 assessment dated [DATE] revealed she had mild or no cognitive impairment. Review of her progress notes revealed no evidence of documented abuse or misappropriation allegations in 2026. She was hospitalized [DATE] for sepsis and returned to the facility 03/06/26.Record review of emails sent by the daughter of Resident #41 to verified email addresses facility staff and ODH revealed the following allegations regarding the care of Resident #41:- An email dated 01/24/26 said Licensed Practical Nurse (LPN) #533 gave Tramadol (opioid pain medication) doses too close together and behaved with animosity and hatred, saying ?ridiculous things' about the resident and daughter.- An email dated 02/02/26 said LPN #533 intimidated Resident #41, who was afraid to be alone with her.- An email dated 02/05/26 said LPN #533 did not give medications as ordered and falsely said the resident refused care. Resident #41 also called for incontinence care and had her light turned off with no response for several hours.- An email dated 02/09/26 said Certified Nurse Aide (CNA) #576 disrespected Resident #41's personal belongings daily and spoke to her like a three-year old.- An email dated 02/18/26 said an unclarified aide enacted verbal abuse by continually yelling at Resident #41.- An email dated 03/19/26 said a set of cabin socks were stolen from Resident #41.Review of an email sent to the ombudsman's office by the daughter of Resident #41 on 03/14/26 revealed she reported a missing camera and SD card.Record review of the ODH Certification and Licensure website revealed the only self-reported incident (SRI) involving Resident #41 within the last six months was SRI #271831 dated 03/09/26, which involved an allegation of neglect and mistreatment by LPN #533 and CNA #576.Interview with Resident #41 on 04/19/26 at 10:08 A.M. revealed workers yelled at her quite often and aides were very nasty. She could not remember the specifics of who or what was involved with these events. She also said staff took the cord from her Bluetooth radio last week, rendering it unusable.Interview with Ombudsman #700 on 04/20/26 at 1:16 P.M. revealed her office was notified of a missing SD card for Resident #41's camera in March 2026. They went to the facility to follow up on the concern and staff denied knowledge of the missing SD card.Interview with the Administrator, Director of Nursing (DON), Assistant Director of Nursing (ADON) #563, and Regional Nurse #626 on 04/20/26 at 2:26 P.M. revealed they denied knowledge of all abuse, neglect, and misappropriation allegations in the above noted emails.Interview with the daughter of Resident #41 on 04/21/26 at 4:07 P.M. revealed she believed staff stole the SD card from the camera the facility removed from Resident #41's room, which contained footage of staff screaming at the resident.Record review of SRI #271831 dated 03/09/26 revealed staff were alleged to have spoken to the resident in a loud, abrasive manner. The report identified concerns of mistreatment with no specifics noted. There was no noted interview or attempted interview with the daughter, and the only noted interview with Resident #41 was the same questionnaire form other residents received wherein pre-written answers were circled indicating she felt safe and had no concerns with neglect or mistreatment. There was also no documented attempt to request footage from a monitoring camera, which was identified in progress notes to be in the resident's room until the facility removed it on 03/12/26.The surveyor confirmed the above findings in the SRI with Regional Nurse #626 on 04/22/26 at 2:34 P.M.Following the above interview, the facility furnished an email from the daughter of Resident #41 dated 03/07/26. In it, the daughter said the two alleged perpetrators were not allowed to go in Resident #41's room given what took place on February 18 and for the management to please be aware there is video documenting everything that went on in (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0607 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	her room that day. She said Resident #41 told her she was terrified of the alleged perpetrators. She said she lost track of how many times she reported the alleged perpetrators via emails. She said that LPN #533 publicly called Resident #41 a pain in the [expletive] and was negligent in giving care and medications. She also said her concerns kept being swept under the carpet.Following the above interview, the facility furnished a call log allegedly demonstrating they made efforts to contact the daughter of Resident #41 for interview during the SRI investigation. The log showed one outbound call to the daughter's phone number labeled no answer, two labeled answered, and one documented inbound call from the daughter. There was no record of the results of these calls.Interview with the Administrator on 04/22/26 at 3:16 P.M. revealed he said Resident #41 did not know what he was talking about when he spoke with her for the SRI investigation. He said the resident's daughter never answers her phone and never calls back when he tries to reach out regarding any of her concerns.Record review of the resident concern log for the past year revealed no documented concerns regarding Resident #41.Record review of the facility's undated electronic monitoring policy revealed the facility would not independently access recordings but would request the recordings if needed for an abuse or other investigation.Record review of the facility's abuse policy dated 01/01/24 revealed the facility was to immediately investigate reports of abuse, neglect, or exploitation. This investigation was to include interviewing all involved persons and to be focused on determining if abuse occurred. All alleged violations were to be reported to the state agency within two hours if the allegations involved abuse and 24 hours if they did not.This deficiency represents noncompliance investigated under Master Complaint Number 2961312, Complaint Numbers 2726820, 2623912 and 2606964.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0609 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Timely report suspected abuse, neglect, or theft and report the results of the investigation to proper authorities. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review, interview, review of the Ohio Department of Health (ODH) Certification and Licensure website, facility policy review, the facility failed to report alleged abuse, neglect, and misappropriation events to State Agency as required. This affected one (Resident #41) of two residents reviewed for abuse. The facility census was 42.Findings include: Record review of Resident #41 revealed she was admitted [DATE] with diagnoses including dementia, anxiety disorder, and chronic respiratory failure. Her Minimum Data Set (MDS) 3.0 assessment dated [DATE] revealed she had mild or no cognitive impairment. Review of her progress notes revealed no evidence of documented abuse or misappropriation allegations in 2026. She was hospitalized [DATE] for sepsis and returned to the facility 03/06/26.Record review of emails sent by the daughter of Resident #41 to verified email addresses of facility staff and ODH revealed the following allegations regarding the care of Resident #41:- An email dated 01/24/26 said Licensed Practical Nurse (LPN) #533 gave Tramadol (opioid pain medication) doses too close together and behaved with animosity and hatred, saying ?ridiculous things' about the resident and daughter.- An email dated 02/02/26 said LPN #533 intimidated Resident #41, who was afraid to be alone with her.- An email dated 02/05/26 said LPN #533 did not give medications as ordered and falsely said the resident refused care. Resident #41 also called for incontinence care and had her light turned off with no response for several hours.- An email dated 02/09/26 said Certified Nurse Aide (CNA) #576 disrespected Resident #41's personal belongings daily and spoke to her like a three-year old.- An email dated 02/18/26 said an unclarified aide enacted verbal abuse by continually yelling at Resident #41.- An email dated 03/19/26 said a set of cabin socks were stolen from Resident #41.Record review of the ODH Certification and Licensure website revealed the only self-reported incident (SRI) involving Resident #41 within the last six months was SRI #271831 dated 03/09/26, which involved an allegation of neglect and mistreatment by LPN #533 and CNA #576.Interview with the Administrator, Director of Nursing (DON), Assistant Director of Nursing (ADON) #563, and Regional Nurse #626 on 04/20/26 at 2:26 P.M. revealed they denied knowledge of all abuse, neglect, and misappropriation allegations in the above noted emails. They confirmed these allegations did not have SRI investigations or documented reporting to ODH.Record review of the resident concern log for the past year revealed no documented concerns regarding Resident #41.Record review of the facility's abuse policy dated 01/01/24 revealed all allegations of abuse, neglect, and exploitation were to be reported to the state agency within 2 hours if the allegations involved abuse and 24 hours if they did not.This deficiency represents noncompliance investigated under Master Complaint Number 2961312 and Complaint Numbers 2726820, 2623912 and 2606964.

F 0610 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Respond appropriately to all alleged violations. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review, interview, review of the Ohio Department of Health (ODH) Certification and Licensure website, and facility policy review, the facility failed to thoroughly investigate all allegations of abuse, neglect, and misappropriation. This affected one (Resident #41) of two residents reviewed for abuse. The facility census was 42.Findings include: Record review of Resident #41 revealed she was admitted [DATE] with diagnoses including dementia, anxiety disorder, and chronic respiratory failure. Her Minimum Data Set (MDS) 3.0 assessment dated [DATE] revealed she had mild or no cognitive impairment. Review of her progress notes revealed no evidence of documented abuse or misappropriation allegations in 2026. She was hospitalized [DATE] for sepsis and returned to the facility 03/06/26.Record review of emails sent by the daughter of Resident #41 verified email addresses of facility staff and the ODH revealed the following allegations regarding the care of Resident #41:- An email dated 01/24/26 said Licensed Practical Nurse (LPN) #533 gave Tramadol (opioid pain medication) doses too close together and behaved with animosity and hatred, saying ?ridiculous things' about the resident and daughter.- An email dated 02/02/26 said LPN #533 intimidated Resident #41, who was afraid to be alone with her.- An email dated 02/05/26 said LPN #533 did not give medications as ordered and falsely said the resident refused care. Resident #41 also called for incontinence care and had her light turned off with no response for several hours.- An email dated 02/09/26 said Certified Nurse Aide (CNA) #576 disrespected Resident #41's personal belongings daily and spoke to her like a three-year old.- An email dated 02/18/26 said an unclarified aide enacted verbal abuse by continually yelling at Resident #41.- An email dated 03/19/26 said a set of cabin socks were stolen from Resident #41.Record review of the ODH Certification and Licensure website revealed the only self-reported incident (SRI) involving Resident #41 within the last six months was SRI #271831 dated 03/09/26, which involved an allegation of neglect and mistreatment by LPN #533 and CNA #576.Interview with Resident #41 on 04/19/26 at 10:08 A.M. revealed workers yelled at her quite often and aides were very nasty. She could not remember the specifics of who or what was involved with these events. She also said staff took the cord from her Bluetooth radio last week, rendering it unusable.Interview with the Administrator, Director of Nursing (DON), Assistant Director of Nursing (ADON) #563, and Regional Nurse #626 on 04/20/26 at 2:26 P.M. revealed they denied knowledge of all abuse, neglect, and misappropriation allegations in the above noted emails and interview.Interview with the daughter of Resident #41 on 04/21/26 at 4:07 P.M. revealed she believed staff stole the SD card from a camera she had set up in Resident #41's room until the facility removed it, which contained footage of staff screaming at the resident.Record review of SRI #271831 dated 03/09/26 revealed staff were alleged to have spoken to the resident in a loud, abrasive manner. The report identified concerns of mistreatment with no specifics noted. There was no noted interview or attempted interview with the daughter, and the only noted interview with Resident #41 was the same questionnaire form other residents received wherein pre-written answers were circled indicating she felt safe and had no concerns with neglect or mistreatment. There was also no documented attempt to request footage from a monitoring camera, which was identified in progress notes to be in the resident's room until the facility removed it on 03/12/26.The surveyor confirmed the above findings in the SRI with Regional Nurse #626 on 04/22/26 at 2:34 P.M.Following the above interview, the facility furnished an email from the daughter of Resident #41 dated 03/07/26. In it, the daughter said the two alleged perpetrators were not allowed to go in Resident #41's room given what took place on February 18 and for the management to please be aware there is video documenting everything that went on in her room that day. She said Resident #41 told her she was terrified of the alleged perpetrators. She said she lost track of how many times she reported the alleged perpetrators via emails. She said that LPN #533 publicly called Resident #41 a pain in the [expletive] and was negligent in giving care and medications. She also said her concerns kept being swept under the (continued on next page)

F 0610 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	carpet.Following the above interview, the facility furnished a call log allegedly demonstrating they made efforts to contact the daughter of Resident #41 for interview during the SRI investigation. The log showed one outbound call to the daughter's phone number labeled no answer, two labeled answered, and one documented inbound call from the daughter. There was no record of the results of these calls.Interview with the Administrator on 04/22/26 at 3:16 P.M. revealed he said Resident #41 did not know what he was talking about when he spoke with her for the SRI investigation. He said the resident's daughter never answers her phone and never calls back when he tries to reach out regarding any of her concerns.Record review of the resident concern log for the past year revealed no documented concerns regarding Resident #41.Record review of the facility's undated electronic monitoring policy revealed the facility would not independently access recordings but would request the recordings if needed for an abuse or other investigation.Record review of the facility's abuse policy dated 01/01/24 revealed the facility was to immediately investigate reports of abuse, neglect, or exploitation. This investigation was to include interviewing all involved persons and to be focused on determining if abuse occurred. All alleged violations were to be reported to the state agency within 2 hours if the allegations involved abuse and 24 hours if they did not.This deficiency represents noncompliance investigated under Master Complaint Number 2961312 and Complaint Numbers 2726820, 2623912 and 2606964.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0677 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Provide care and assistance to perform activities of daily living for any resident who is unable. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review, observation, and interview, the facility failed to provide appropriate oral and nail care for dependent residents. This affected one (Resident #28) of three residents reviewed for activities of daily living (ADL). The facility census was 42.Findings include:Record review of Resident #28 revealed he was admitted to the facility 07/03/25 with diagnoses including respiratory failure, paraplegia, and anoxic brain damage. His care plans dated 07/21/25 noted he was totally dependent on staff for ADL, and his nails should be checked daily for length and cleanliness. His Minimum Data Set (MDS) 3.0 assessment dated [DATE] identified he was never or rarely understood, was dependent on staff for ADL care, and his mouth could not be assessed for dental problems. He was ordered to receive oral care twice per day and had no orders indicating any treatment of thrush (an oral fungal infection commonly involving white patches on the tongue).Observation of Resident #28 on 04/21/26 at 11:10 A.M. revealed his teeth appeared brown, although the surveyor could not determine if the color was natural or due to debris in the mouth. He was not interviewable or responsive to questions. His mouth hung open, and a white rough layer could be visualized on the tongue consistent with thrush. His fingernails extended roughly one to two centimeters from the top of the fingers and curled downwards at their ends.Interview with Assistant Director of Nursing (ADON) #563 on 04/21/26 at 11:31 A.M. verified these findings.This deficiency represents noncompliance investigated under Master Complaint Number 2961312, and Complaint Numbers 2726820 and 2668853.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0684 Level of Harm - Actual harm Residents Affected - Few	Provide appropriate treatment and care according to orders, resident?s preferences and goals. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review, observations, resident and staff interviews, and facility policy review, the facility failed to ensure that a resident with a new rightˆleg injury received timely and thorough assessment, monitoring, treatment, and physician notification following a fallˆrelated injury. This resulted in the worsening of the untreated rightˆleg condition, which progressed to an open necrotic wound requiring hospitalization, surgical debridement, and treatment for sepsis. This affected one (Resident #18) of four residents reviewed for hospitalization. The facility census was 42.Actual harm began on 02/05/26, when Resident #18 returned from the hospital with the right lower extremity that was red, shiny, and exhibiting moderate drainage, yet the facility failed to perform a wound assessment, implement monitoring, provide treatment, or notify the physician of this significant change in condition. The facility continued to omit monitoring and followˆup from 02/06/26 through 02/10/26, during which clinical concerns increased but no documentation or treatment was provided regarding the resident's rightˆleg condition. By 02/20/26, the resident developed a weeping open wound, and by 02/21/26, a necrotic wound measuring 5.5 centimeters (cm) by 7.5 cm. On 02/24/26, the wound care team documented that the wound to the right lower extremity resulted from a fall on 02/04/26 fall, and the resident subsequently required hospitalization and surgical debridement.Findings include:Review of the medical record for Resident #18 revealed she initially admitted on [DATE] and readmitted on [DATE]. Diagnoses included chronic respiratory failure, dependence on respirator and heart failure.Review of the care plan dated 04/15/22 revealed Resident #18 required assistance for activities of daily living (ADL), was at risk for falls, had a high body mass index (BMI) related to obesity, and had potential for alteration in skin integrity with interventions including: protective and preventative care, inspect for any reddened areas during daily care, observe, monitor and report changes, observe changes in ADL ability, and adjusting assistance as needed with a goal to be free from injury. Review of the care plan revealed no actual areas of skin impairment related to the right leg were present.Review of the quarterly Minimum Data Set (MDS) assessment dated [DATE] revealed Resident #18 was cognitively intact. She was dependent on staff for bed mobility and showers/bathing and had functional limitations to range of motion to bilateral lower extremities. She was always incontinent of bowel and bladder. Review of the weight summary dated for the last 90 days revealed Resident #18 weighed 557.8 pounds. Review of the progress note dated 02/04/26 at 8:04 A.M. revealed on 02/04/26, at approximately 5:15 A.M., Resident #18 fell during incontinent care being provided by one certified nursing assistant (CNA). Progress notes documented no visible injuries initially; however, by 12:04 P.M., the resident reported pain to the right leg. Portable xˆrays could not be completed due to pain, and she was transferred to the hospital. Hospital evaluation identified significant rightˆleg pain but no fracture.Review of the hospital paperwork dated 02/04/26 at 2:09 P.M. for Resident #18 revealed she arrived to the Emergency Department (ED) via the fire department due to a fall with a pain level of 10 out of 10 to both legs. Resident #18 revealed she had pain just below her knee to the ankle after receiving care for a fall at the facility. Resident #18's physical exam revealed the right lower extremity had tenderness of the anterior leg to the ankle and after x-rays, no fractures were found. Resident #18 was subsequently discharged back to the facility with a contusion of the right lower extremity after sustaining a fall. Review of the progress note dated 02/05/26 at 3:44 A.M. the resident returned to the facility with the right leg red and shiny with moderate drainage. No wound assessment, no measurements, no documentation of size, no evaluation of drainage, no monitoring parameters, no treatment orders, and no physician notification occurred.From 02/06/26 through 02/10/26, Resident #18's progress notes reflect increasing clinical concerns but contain significant omissions. On 02/06/26, the resident reported moderate pain relieved by medication, and labs remained pending. By 02/07/26, the physician had been notified of lab results, though the documentation did not identify which labs were drawn or why they were (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0684 Level of Harm - Actual harm Residents Affected - Few	clinically relevant. On 02/08/26, the resident was described as somewhat confused with oxygen saturations dropping to 86-89 percent on 10 liters per minute (L/min) via ventilator, later improving to 92 percent after being switched to 5 L/min via nasal cannula. On 02/09/26, continued confusion led to new orders for a urinalysis, culture and sensitivity, complete blood count (CBC) with differential, and complete metabolic panel (CMP); later that day, further labs and chest xˆrays were ordered. In the early hours of 02/10/26, repeat culture and metabolic panel labs were ordered, and later that morning the provider directed staff to hold Lasix (diuretic), insert a midline IV, place a urinary catheter, and monitor intake and output. By 02/10/26, the resident was transferred to the hospital for altered mental status and unspecified abnormal lab results and subsequently admitted to the intensive care unit (ICU) with sepsis. Throughout all documentation from 02/06/26 through 02/10/26, there is no mention of the rightˆleg redness that had been documented on 02/05/26 following the fall that occurred on 02/04/26, despite the clinical relevance of this earlier finding.Review of the hospital after visit summary dated 02/19/25 revealed Resident #18 was hospitalized for an infection in her bloodstream. The summary was absent of any information regarding the right leg.Review of the progress note dated 02/19/26 at 6:49 P.M. revealed Resident #18 returned from the hospital with some discoloration to the right lower extremity. Review of the progress note dated 02/20/26 at 6:55 A.M. revealed Resident #18 was very weak and tired, waking up for brief periods during conversations but falls right back to sleep. She had 4 plus pitting edema to bilateral lower extremities. At 6:21 P.M., staff were unable to do an adequate skin assessment due to Resident #18 being out of breath while on her side. Noted a weeping area to inner right calf, and a black weeping wound under her right calf. She refused to allow the nurse to measure or dress it. She was educated on the risk of refusal and benefits of wound dressings. She continued to refuse. The nurse practitioner (NP) #950 was notified of her refusal. NP #950 stated to attempt to put an abdominal (ABD) dressing to the site. Resident #18 continued to refuse. The facility wound care team was notified of needing a wound consult form signed. At 8:18 P.M., the nurse attempted to wake Resident #18 to take her medication and she refused. At 10:38 P.M. Resident #18 remained very tired and continued to refuse to take her medication. Review of the progress notes on 02/21/26 revealed at 1:08 A.M. Resident #18 was awake and asking for respiratory and agreed to take her medication. She continued to refuse other care. At 5:59 A.M. she was offered hygiene care and refused multiple times. She was reminded of importance of wound care in which she replied, shut up, I don't care, leave me alone. At 5:04 P.M. an area of necrotic tissue was observed to the right lower extremity measuring 5.5 cm by 7.5 cm by 0.1 cm. The area was cleansed with normal saline and a Xeroform (petroleum-based non-adherent dressing) dressing and ABD pad applied. NP #950 was notified. Review of the care plan created 02/21/26 revealed Resident #18 had an actual area of skin impairment related to right lower leg necrotic tissue. Interventions included asking resident about pain level prior to dressing change procedure, medicate if needed, maintain enhanced barrier precautions (EBP), observe for clinical changes, such as infection and/or worsening of wound, Pressure reducing mattress, pressure reducing chair cushion, refer to the dietitian to determine need/no need for dietary intervention, skin observation and document on bath/shower days, charge nurse to notify the wound nurse, physician, and family of any new areas.Review of the progress notes on 02/22/26 revealed at 1:05 A.M., Resident #18 was resting in bed, all care was completed, all medications were administered, and she denied pain. At 5:38 A.M., she was upset that staff was encouraging hygiene. While staff were attempting to provide hygiene care, she asked them to leave the room. She was educated on the importance of hygiene and continued to refuse. At 5:48 P.M. and 11:58 P.M., Resident #18 had rested in bed all shift, and all medications were administered as ordered. Review of the progress notes on 02/23/26 revealed at 4:42 A.M. Resident #18 consistently made it difficult to perform hygiene by throwing her weight and arms back, swinging and resisting turning during care/ She was educated on the importance of body mechanics and told the staff, The hell with you guys. At 3:15 P.M., she declined the need for incontinent care. She was educated on the importance of routine care.Review of the wound care note (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0684 Level of Harm - Actual harm Residents Affected - Few	dated 02/24/26 at 12:15 P.M. revealed Resident #18 had an initial consultation for wound care services due to having a recent fall out of bed (02/04/26) and being hospitalized for sepsis. Review of the wound note revealed Resident #18's wound to the right lower extremity posterior aspect resulted from the fall on 02/04/26. The wound measured 9.1 cm by 10.1 cm and the depth of the wound was unable to be determined. Treatment orders were in place, and the wound care team will follow-up weekly. Review of the progress notes dated 02/25/26 revealed a note at 7:28 A.M. stating Resident #18 was approached several times throughout the shift for hygiene (check and change), each time she refused. She was educated on the importance of being clean and dry for skin integrity. She verbalized understanding yet continued to refuse. At 12:40 A.M., Resident #18 was assessed by NP #950 for a necrotic area to the right lower extremity. Upon communication with the physician, Resident #18 received new orders to be sent to the hospital for surgical debridement. Review of the progress note dated 02/26/26 at 5:28 P.M. revealed Resident #18 was admitted to the hospital with diagnosis of sepsis and surgical debridement of the right lower extremity.During an interview on 04/19/26 at 10:25 A.M., Resident #18 stated she had fallen out of bed during care. One staff member was providing care when she was pushed out of bed, fell on the floor and injured her leg. Resident #18 said the wound was not healing, and she was now at risk of losing her leg.During an interview on 04/20/26 at 2:26 P.M., the Director of Nursing (DON), Licensed Practical Nurse (LPN) #563 and Regional Nurse #626 revealed Resident #18 had a fall while receiving incontinence care and as a result a hematoma formed that later turned into a leg wound. LPN #563 revealed Resident #18's leg wound was necrotic and had some redness and swelling and required debridement in the hospital.During an interview on 04/22/26 at 10:44 A.M. with LPN #623 stated Resident #18 complained of leg pain since her fall, and the fall caused cellulitis and ongoing issues.During an interview on 04/29/26 at 12:03 P.M., LPN #563 stated Resident #18 had no skin assessments regarding her right lower extremity, no documentation regarding follow-up care and/or notification to the physician and no new orders for treatment. The skin issue related to her right lower extremity did not present itself until 02/20/26, and after a change in condition, Resident #18 was sent to the hospital. Resident #18's hospital stay and return to the facility was related to UTI and was treated with antibiotics. Resident #18's skin issues were not the focus due to her having a history of skin concerns. LPN #563 verified after Resident #18 returned from the hospital on [DATE], a progress note indicated she had a red, swollen area with moderate drainage to her right lower extremity and the wound was not properly assessed, monitored, treated, or documented to prevent further harm. The facility's Pressure Injury Prevention and Management Policy requires staff to follow a systematic process for all skin integrity concerns, including prompt identification, assessment, documentation, treatment, monitoring, and provider notification of any skin changes. The policy mandates that licensed nurses complete fullˆbody skin assessments on admission, readmission, weekly, and as needed, and that any skin changes be immediately assessed, with measurements, wound characteristics, and findings documented in the medical record. It further requires the implementation of timely, evidenceˆbased interventions based on the wound's characteristics and the resident's risk factors, along with ongoing monitoring to evaluate healing and identify complications. The policy also directs staff to notify the physician of any new wounds, lack of healing, or complications, and to modify the care plan when a wound worsens or the resident's condition changes. These requirements apply broadly to all wounds, not only pressure injuries, and establish the facility's responsibility to ensure prompt assessment, treatment, and monitoring of any newly identified skin issue.This deficiency represents non-compliance investigated under Complaint Number 2795717.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0686 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Provide appropriate pressure ulcer care and prevent new ulcers from developing. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review, observation, and interview, the facility failed to ensure that a resident with a documented Stage IV (full thickness tissue loss with exposed bone, tendon or muscle) pressure injury received repositioning according to their plan of care and accepted standards of practice. This affected one (Resident #28) of three residents reviewed for pressure sore care. The total census was 42.Findings include:Record review of Resident #28 revealed he was admitted to the facility 07/03/25 with diagnoses including respiratory failure, paraplegia, and anoxic brain damage. His care plans dated 07/21/25 noted he was totally dependent on staff for activities of daily living (ADL) and that he was at risk for skin breakdown and should be turned every two hours. His Minimum Data Set (MDS) 3.0 assessment dated [DATE] identified he was never or rarely understood, was dependent on staff for bed mobility, and had pressure sores present on admission. Review of his most recent wound assessment dated [DATE] revealed he had a Stage IV pressure sore on his buttocks.Observation and attempted interview of Resident #28 on 04/20/26 at 10:18 A.M. revealed he was not interviewable and demonstrated no evidence of understanding or awareness of the surveyor's questions. He was in bed laying on his back with a wedge cushion on a bedside table at the foot of the bed. His head was elevated roughly 30 degrees and there were no pillows or other devices beneath either side to turn him off his back.Observations of Resident #28 on 04/20/26 at 12:54 P.M., 3:09 P.M., and 5:05 P.M. revealed he continued to be on his back with the wedge pillow on a bedside table during each observation.Interview with Assistant Director of Nursing (ADON) #563 on 04/20/26 at 5:15 P.M. confirmed Resident #28 had not been repositioned for several hours that day.This deficiency represents noncompliance investigated under Complaint Number 2726820.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0689 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Ensure that a nursing home area is free from accident hazards and provides adequate supervision to prevent accidents. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review, observations, resident and staff interviews, and policy review, the facility failed to provide adequate supervision and failed to ensure the safe use of assistive devices during care and transfers. This failure resulted in one resident (#18) falling from bed during singleˆstaff incontinent care despite weighing 557.8 pounds and being dependent for activities of daily living (ADL), and one resident (#32) sliding from a mechanical lift pad during transfer due to improper pad placement. This deficient practice affected two residents (#18 and #32) of three sampled residents reviewed for accidents. The facility census was 42.Findings include: 1. Review of the medical record for Resident #18 revealed she initially admitted on [DATE] and readmitted on [DATE]. Diagnoses included chronic respiratory failure, dependence on respirator and heart failure. Review of the care plan dated 04/15/22 revealed Resident #18 required assistance for activities of daily living (ADL), was at risk for falls, had high body mass index (BMI) related to obesity, and had potential for alteration in skin integrity with interventions including: protective and preventative care, inspect for any reddened areas during daily care, observe, monitor and report changes, observe changes in ADL ability, and adjusting assistance as needed with a goal to be free from injury. Review of the care plan revealed no actual areas of skin impairment related to the right leg were present. Review of the quarterly Minimum Data Set (MDS) assessment dated [DATE] documented Resident #18 was cognitively intact, dependent on staff for bed mobility and bathing, had limited range of motion to both lower extremities, and was always incontinent of bowel and bladder. Review of the weight records for the prior 90 days showed the resident weighed 557.8 pounds. Review of the progress notes revealed on 02/04/26 at approximately 5:15 A.M., Resident #18 fell from bed during incontinent care being performed by one certified nursing assistant (CNA). The resident rolled and fell to the floor while the CNA attempted to assist her. There was no visible injuries initially; however, by 12:04 P.M., the resident reported pain to the right leg. Portable xˆrays could not be completed due to pain, and she was transferred to the hospital. Hospital evaluation identified significant rightˆleg pain but no fracture. Review of the fall investigation dated 02/04/26 at 5:23 A.M. revealed LPN #543 was notified by CNA #606 that Resident #18 was turning during ADL care and fell on the floor. LPN #543 noted Resident #18 was lying in a supine position on the floor, alert, conscious, and talking. Resident #18 was assessed immediately and was able to move all limbs at baseline with no evidence of pain or discomfort noted. Review of the investigation revealed the fire squad was called for assistance to get Resident #18 back into bed. Resident #18 refused to go to the hospital for further evaluation due to reports of no pain or discomfort. Resident #18 was sent to the hospital to have an evaluation after her refusal with all hospital x-rays negative. Review of the witness statement, within the fall investigation, dated 02/04/26 written by CNA #606 revealed she was providing care to Resident #18, and she proceeded to roll over onto her side towards the door. Resident #18 then grabbed the rail and was trying to get her leg on top of the other leg and in the process, she kept rolling and fell onto the floor. CNA #606 revealed she ran to the other side where she was to check on her before running out of the room for assistance. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0689 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Review of the hospital paperwork dated 02/04/26 at 2:09 P.M. for Resident #18 arrival to the Emergency Department (ED) revealed she arrived via the fire department due to a fall with a pain level of 10 out of 10 to both legs. Resident #18 revealed she had pain just below her knee to the ankle after receiving care for a fall at the facility. Resident #18 physical exam revealed right lower extremity had tenderness of the anterior leg to the ankle and after x-rays, no fractures were found. Resident #18 was subsequently discharged back to the facility with a contusion of the right lower extremity after sustaining a fall. During an interview on 04/19/26 at 10:25 A.M., Resident #18 stated she had fallen out of bed during care. One staff member was providing care when she was pushed out of bed, fell on the floor and injured her leg. Resident #18 said the wound was not healing, and she was now at risk of losing her leg. During interviews on 04/20/26, Regional Nurse #626 and LPN #563 acknowledged Resident #18 required a twoˆperson assist for transfers using a mechanical lift and weighed 558 pounds. Nevertheless, they failed to recognize that these same factors necessitated twoˆstaff assistance for bed mobility and incontinent care and continued to assert that she required only one staff member for ADL, despite the MDS documenting she was dependent on at least two staff for ADL. A reasonable person, considering Resident #18's 557.8ˆpound weight, complete dependence for bed mobility, bilateral lowerˆextremity limitations, incontinence, and documented requirement of twoˆstaff assistance for transfers, would expect that at least two staff members were necessary to safely perform bed mobility and incontinent care. The facility's failure to provide twoˆstaff assistance constituted inadequate supervision and resulted in a foreseeable and avoidable fall with subsequent injury. 2. Review of the medical record revealed Resident #32 was admitted to the facility on [DATE] with diagnoses including hemiplegia (partial paralysis) and hemiparesis (partial muscle weakness) following a cerebral infarction (stroke), hypertension (high blood pressure), dysphagia (difficulty swallowing), dysarthria (difficulty speaking), acute and chronic respiratory failure, heart failure, and type II diabetes mellitus. Review of the care plan created on 08/09/22 revealed Resident #32 had a potential risk for falls with interventions including therapy to screen/evaluate when indicated, observe for changes in ADL ability and adjust assistance provided accordingly, ensure the call light is within reach, assist with transfers as needed, high-low bed to be in lowest position while occupied, keep bed against wall (added 09/20/22), educating the resident to use the call light for assistance (added 07/30/23), perimeter mattress to bed (added 01/10/24) remind her to ask for help to obtain items off the floor (added 01/08/26). Review of the care plan created on 08/10/22 revealed Resident #32 required assistance with ADL related to status post craniotomy, encephalopathy, respiratory failure, obstructive hydrocephalus, and dysphagia. Interventions including keeping call light within reach, providing incontinence care with routine rounds and as needed, and chair to bed/bed to chair transfers via mechanical lift (added 02/06/24). The MDS dated [DATE] documented the resident was cognitively intact and dependent on staff for ADLs including toilet hygiene, bathing, lowerˆbody dressing, footwear, and transfers. The Fall Risk Assessment (02/05/26) classified her as a moderate fall risk. (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0689 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	A nursing progress note (04/04/26) documented that on 04/03/26, during a twoˆstaff transfer from wheelchair to bed using a mechanical lift, the resident slid from the lift pad to the floor because the pad was improperly positioned. Review of the facility document titled, Fall/Skin Incident Report (04/03/26), CNA #506 revealed while attempting to transfer the resident to the bed, they noticed the mechanical lift pad was not all the way under the resident's buttocks and tried to adjust her the best we could. It wasn't good enough because she slipped out of it. Review of LPN #618's written statement revealed when the resident was being transferred, she slid from the mechanical lift pad onto the floor. The facility's Fall Prevention and Management Policy (revised 10/02/22) requires that all residents be assessed for fall risks on admission, quarterly, after any fall, and as needed. Identified risks must lead to individualized interventions, added to the care plan, monitored for effectiveness, and revised as needed. All falls must be assessed by nursing, investigated, and reviewed by the interdisciplinary team, and appropriate fallˆprevention measures must be implemented. Per policy, a fall includes any unintentional descent to the floor, including near misses, and the facility must ensure safe supervision and correct use of assistive devices to prevent foreseeable accidents. This deficiency represents non-compliance investigated under Complaint Number 2795717.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0692 Level of Harm - Actual harm Residents Affected - Few	Provide enough food/fluids to maintain a resident's health. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on record review, staff interviews, and policy review, the facility failed to ensure sufficient fluid intake to maintain proper hydration and health and facility failed to monitor and implement interventions to maintain proper nutritional health. This affected two (Residents #18 and #46) of four residents reviewed for nutrition. The facility census was 42.Actual harm occurred on 10/31/25 when Resident #46 was transferred to the hospital for treatment of severe dehydrationˆrelated complications due to the facility's failure to adequately monitor and assess his hydration status, failure to ensure tubeˆfeeding and flush orders were written correctly and implemented as intended, and failure to respond appropriately to his documented change in condition.Findings include:1. Record review revealed Resident #46 was admitted on [DATE]. Diagnoses included respiratory failure, hypertension, and dysphagia (difficulty swallowing). Resident #46 discharged from the facility on 10/31/25.Review of the care plan dated 11/07/24 revealed Resident #46 was at risk for alteration in nutrition and/or hydration related to total dependence on enteral tube feed to meet nutrition and hydration needs with interventions including monitoring for signs and symptoms of dehydration, reviewing labs as ordered and requesting dietary interventions.Review of the progress note dated 07/04/25 at 10:00 A.M. revealed Resident #46 received nothing by mouth (NPO) with a feeding tube, had a significant weight loss and was currently on Isosource 1.5 mL at 70 mL every 22 hours with 200 mL free water flush every four hours. Review of the progress note revealed Resident #46's current order was discontinued and new orders for weight and nutrition monitoring and Isosource 1.5 mL at 70 mL with 55 mL free water flush were implemented.Review of the progress note dated 07/04/25 at 10:13 A.M. revealed Resident #46 had a new intervention of weekly weights to determine if intervention was necessary. Review of the physician orders dated 07/04/25 revealed an enteral feed order for Isosource 1.5 milliliters (mL) at 70 mL per hour, off two hours for activities of daily living (ADL) care and a free water flush of 55 mL every 22 hours. Review of the order revealed an end date of 11/03/25.Review of the nutrition assessment dated [DATE] revealed Resident #46 was on an NPO diet with tube feed. Review of the tube feed order revealed Resident #46 was to receive Isosource 1.5 mL with 55 mL free water flush every 22 hours.Review of the Medication Administration Record (MAR) and Treatment Administration Records (TAR) dated July, August, September and October 2025 revealed Resident #46 received enteral feed order for Isosource 1.5 mL at 70 mL with 55 mL free water flush every 22 hours as scheduled. Review of the Minimum Data Set (MDS) assessment dated [DATE] revealed Resident #46 was cognitively intact and was independent in making decisions regarding tasks of daily life. Resident #46 required some assistance from staff with ADL.Review of the progress note dated 10/31/25 at 10:50 A.M. revealed Resident #46 had a moist cough and was somewhat lethargic during medication administration. Resident #46 required increased verbal stimulation to arouse but reported he was tired and wanted to stay in bed. Resident #46 was given Tylenol (analgesic) and was awaiting further instruction.Review of the progress note dated 10/31/25 at 10:50 A.M. revealed Resident #46 had a change in condition and was transferred to the ER. Review of the follow-up progress note dated 10/31/25 at 2:24 P.M. revealed Resident #46 received new orders for blood work, an urgent chest x-ray, oxygen if needed, Tylenol every six hours for comfort, Augmentin (antibiotic) twice daily for seven days, and Duoneb (inhalation solution to treat bronchospasms) breathing treatments as needed for shortness of breath. Resident #46 also received orders to be closely monitored with vital signs each shift, given extra fluids through the intravenous (IV) line, starting with a bolus of 0.9 percent Normal Saline (NS) and then a continuous infusion and a one-time water bolus through the feeding tube.Review of the progress note dated 10/31/25 at 3:15 P.M. revealed Resident #46 had a reported critical sodium level of 123 millimoles per liter (mmol/L) (normal is between 135 and 145 mmol/L) and was being transferred to the hospital via emergency medical services (EMS). Review of the weight summary dated July, August, September 2025 revealed Resident #46 had monthly weights, but (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0692 Level of Harm - Actual harm Residents Affected - Few	no weekly weights as requested by Registered Dietitian (RD) #630. Review of the weight summary revealed no other documented weights for the duration of Resident #46's stay. Review of the progress note documented by Registered Nurse (RN) #631, dated 10/31/25 revealed Resident #46 had an acute visit after being found with a fever of 101.2 degrees Fahrenheit (F) and tachycardia (increased heart rate) of 104 beats per minute (bpm). Resident #46 had no signs or symptoms of a urinary tract infection (UTI) and had dry mucous membranes. Resident #46 was resting in bed, lethargic, tired, and per staff was normally conversational. Resident #46 received initial orders for blood work, an urgent chest x-ray, oxygen if needed, Tylenol every six hours for comfort, Augmentin twice daily for seven days, and Duoneb breathing treatments as needed for shortness of breath. Resident #46 also received orders to be closely monitored with vital signs each shift, given extra fluids both through the IV and a one-time water bolus through the feeding tube. Resident #46 had a sodium level of 173 mmol/L and was to be sent to the ER.Review of the hospital laboratory results dated [DATE] revealed Resident #46 had NA levels of 173, BUN levels of 58 milligrams per deciliter (mg/dL) (normal is 8 to 24 mg/dL in adult males), Creatinine levels of 1.3 mg/dL (normal is 0.7 to 1.3 mg/dL), and Glomerular Filtration Rate (GFR) levels of 56 milliliters per minute (mL/min) (normal is above 90 mL/min).Review of the hospital paperwork dated 11/03/25 revealed Resident #46 was admitted to the hospital with hypernatremia from free water deficit, acute kidney infection from dehydration and toxic metabolic encephalopathy, multifactorial etiology, significantly due to dehydration and hypernatremia. Resident #46 was transferred to the hospital for lethargy and abnormal labs with high sodium levels above 170, which was confirmed upon arrival.During an interview on 04/20/26 at 2:26 P.M., Assistant Director of Nursing (ADON) #563 stated Resident #46 went to the hospital due to being septic and dehydrated.During an interview on 04/27/26 at 9:22 A.M., Hospital Liaison/RN #951 stated Resident #46 arrived at the hospital without any paperwork, very high levels of sodium and was severely dehydrated. After hospital blood work, Resident #46's sodium level was 173. She spoke with Licensed Practical Nurse (LPN) #612 and requested copies of recent labs from the facility, but was informed there were no copies of recent labs to provide.During an interview on 04/27/26 at 9:59 A.M., ADON #563 stated Resident #46 had a noticeable change in condition, RN #631 was contacted, and new orders were received for labs, fluids and antibiotics. ADON #563 revealed Resident #46 he had critical labs and needed to be sent to the ER and was subsequently admitted . ADON #563 reviewed the tube feeding order and stated she was not sure why the flush order was written to be done every 22 hours. She stated there was no documentation that indicated staff were monitoring, inputting formulas correctly, or following up with RD #630 for confirmation regarding Resident #46 tube feed. During an interview on 04/27/26 at 10:36 A.M., LPN #612 stated she was the night nurse, but she could not recall anything related to Resident #46's transfer to the hospital.During an interview on 04/27/26 at 1:35 P.M., Regional Nurse #626 stated she was not sure if Resident #46's hospitalization was the cause of free water deficit or not getting enough water from the tube feed. She confirmed there were no tube feed machines that could run feed and flushes at the same time. ADON #563, who was present for the interview, stated multiple bags can hang simultaneously but could not run at the same time because different time intervals would need to be entered into the machine to indicate when to start the feed and when to start the flush. During an interview on 04/27/26 at 2:23 P.M., RD #630 stated she changed Resident #46's flush from bolus to having it with the tube feed but could not remember why. She did not know what type of feeding tube pump Resident #46 utilized. After reviewing Resident #46's record, RD #630 could not provide any information regarding why the flush orders were not clarified to prevent too little flushing, the risk of tube clogging, dehydration or excess fluid. Review of the facility document titled Hydration, dated 05/20/22, revealed the facility had a policy in place to provide sufficient fluid, including water and other liquids, consistent with resident needs and preferences to maintain proper hydration and health. Further review of the policy revealed the dietician would gather and use data from the nutritional assessment and ongoing monitoring to determine if fluid intake was adequate to meet hydration needs. Review of the document revealed the (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0692 Level of Harm - Actual harm Residents Affected - Few	facility did not implement the policy.Review of the facility document titled Appropriate Use of Feeding Tubes, revised 06/04/23, revealed the facility had a policy in place to ensure that a resident acceptable parameter of nutritional and hydration status was maintained. Review of the document revealed the facility did not implement the policy.2. Record review revealed Resident #18 was admitted on [DATE]. Diagnoses included chronic respiratory failure, dependence on respirator (ventilator status), and heart failure.Review of the care plan dated 04/15/22 revealed Resident #18 required assistance for ADL, was at risk for falls, and had a high body mass index (BMI) related to obesity, with interventions including observing, monitoring and reporting changes, assisting with ADL, following physician orders and monitoring weights.Review of the nutrition and hydration assessment dated [DATE] revealed Resident #18 weighed 399 pounds, was on a low concentrated sweets diet with regular texture with interventions that included weight monitoring per physician orders. Resident #18's skin was intact with no new recommendations. Review of the nutrition and hydration assessment dated [DATE] revealed Resident #18 weighed 399 pounds, was on a low concentrated sweets diet with regular texture with interventions that included weight monitoring per physician orders. Resident #18 skin was intact with no new recommendations. Review of the assessment revealed it was dated 10/31/25 and identical to the assessment completed approximately four months prior. Review of the assessment revealed it was dated 10/31/25 but was not locked until 01/23/26.Review of the progress note dated 02/20/26 at 11:20 A.M. revealed resident #18 returned to the facility after being hospitalized . Resident #18 weighed 399 pounds prior to her hospitalization and had a current weight of 573 pounds. s. Resident #18 received no new recommendations and to continue with weight monitoring per physician orders and report any significant changes.Review of the nutrition and hydration evaluation dated 04/03/26 revealed Resident #18 weighed 558 pounds, was considered morbidly obese, had a regular diet with regular textures with interventions that included strict weight monitoring, monitoring weights per physician orders and notify physician of any significant weight changes.Review of the weight summary revealed Resident #18 weighed 381 pounds on 07/02/25; 398.9 pounds on 10/23/25; and 557.8 pounds on 04/02/26. Review of the weight summary revealed Resident #18 was not being weighed weekly, bi-weekly, or monthly.Review of the MDS assessment dated [DATE] revealed Resident #18 was cognitively intact and was dependent on staff for ADL. She had no behavior problems and did not reject care.Review of the current physician orders, completed and discontinued, revealed no orders for weight monitoring.Review of the progress notes dated 04/10/26 at 9:05 A.M. revealed Resident #18 had a nutrition review related to significant weight change. Resident #18 had a most recent weight of 558 pounds with a BMI of 90, which was morbidly obese. Resident #18 had gained 159 pounds over five months, which was unplanned and undesired. Resident #18 received new orders for daily weights for a week to confirm weight gain.Review of the medical record for Resident #18 revealed no documentation related to physician notification, weight orders, weight monitoring, or in-depth assessments of Resident #18 nutritional status related to significant weight gain. Review of the medical record revealed Resident #18 refused being weighed twice with no other attempts documented.During an interview on 04/21/26 at 12:19 P.M., Certified Nurse Assistant (CNA) #570 stated staff CNAs were responsible for weighing residents according to their orders. Most residents were weighed monthly, unless informed by the nurse to do it more often. CNA #570 stated Resident #18 was not weighed often, and she could not remember the last time she was weighed. Resident #18 was not on the list of residents to be weighed daily, weekly, or monthly.During an interview on 04/21/26 at 12:21 P.M., LPN #513 stated CNAs were responsible for weighing residents and reporting the weights to the nurses. Residents were weighed according to their orders and personal care needs. Some residents were on daily, weekly, or monthly weights. LPN #513 stated Resident #18 was morbidly obese and was nutritional risk due to her size, eating habits, medical diagnoses, and skin issues. RD #630 followed Resident #18 to ensure she remained at baseline with no decline in health. LPN #513 verified there were no orders for daily, weekly, or monthly weights.During an interview on 04/22/26 at 11:43 A.M., RD #630 stated Resident #18 was (continued on next page)

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0692 Level of Harm - Actual harm Residents Affected - Few	morbidly obese and had a significant weight increase and was recently placed on fluid restrictions. RD #630 stated she was not sure why Resident #18 was placed on fluid restrictions, but she assumed it was due to retaining water. RD #630stated she was only provided updates on Friday's during risk meetings. She was monitoring Resident #18's weights weekly and was aware of her weight gain of over 100 pounds. RD #630 verified there were no orders for daily, weekly, or monthly weights and no ongoing documented refusals. RD #630 also revealed Resident #18's January 2026 assessment was the most recent weight obtained but could not identify where the weight came from since the last weight documented was from October 2025. RD #630 stated she did not have a new weight for Resident #18, so she reused a previous documented weight. RD #630 revealed she had not assessed Resident #18 in person, therefore her documented assessments were only from information gathered from risk meetings and the medical record. EMR. RD #630 revealed she used the information from previous assessments and other areas of Resident #18 medical record to complete nutritional documentation. RD #630 acknowledged that the information documented in Resident #18 medical record did not accurately reflect Resident #18's current nutritional health status. This deficiency represents non-compliance investigated under Complaint Numbers 2668853 and 1320283 (OH00166923).

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0803 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Ensure menus must meet the nutritional needs of residents, be prepared in advance, be followed, be updated, be reviewed by dietician, and meet the needs of the resident. Based on record review, observation, review of the facility policy and interview, the facility failed to ensure the correct serving size for the mechanically altered meat was served. This affected three (Residents #6, #22, and #33) of three residents that received a mechanically altered diet. The facility census was 42.Findings include:Observation of the tray line on 04/21/26 between 12:31 P.M. and 12:49 P.M. revealed Dietary Aide (DA) #555 serving mechanically altered meals using a green-handled #12 scoop, providing only one scoop of mechanically altered meat per meal. At 12:49 P.M., staff were observed pushing the last meal cart to the final unit.Review of the diet extension sheet showed that the mechanically altered meat (beef stroganoff) was to be served using a #6 scoop.During an interview on 04/21/26 at 12:50 P.M., DA #555 and Regional Dietary Manager (RDM) #900 confirmed that the green-handled scoop used was a #12 scoop. RDM #900 stated that, when using a #12 scoop, DA #555 should have provided two scoops to meet the required portion size. DA #555 verified she had provided only one scoop to each resident receiving mechanically altered beefReview of the diet order listing report dated 04/19/26 confirmed that three residents (Residents #6, #22, and #33) were receiving mechanically altered diets.Review of the facility's undated Scoop Sizes chart showed that a #12 green scoop provides 2.78 ounces, while the #6 white scoop provides 4.66 ouncesReview of the Portion Control/Spreadsheets policy (revised 08/01/24) indicated that to ensure nutritional adequacy, residents must receive the appropriate portions of food as planned on the menu.This deficiency represents non-compliance investigated under Complaint Numbers 2726820,2623912, and 1320283 (OH00166923).

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
F 0842 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Safeguard resident-identifiable information and/or maintain medical records on each resident that are in accordance with accepted professional standards. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on resident record review and staff interviews, the facility failed to ensure the accuracy and consistency of the medical record when resident documentation contained conflicting information, including two different mattress orders that were both documented as being in place for the same dates. This affected one (Residents #17) of 22 residents sampled during the survey. The facility census was 42.Findings include:Review of Resident #17's medical record revealed an admission date 12/19/25 with diagnoses of bilateral primary osteoarthritis of hip, morbid obesity, and type II diabetes mellitus with hyperglycemia.Record review of the Minimum Data Set (MDS) 3.0 assessment dated [DATE] revealed Resident #17 was cognitively intact and was at risk for developing pressure ulcers.During an interview on 04/19/26 at 10:12 A.M., Resident #17 reported he had not had an air mattress since the end of March 2026. However, physician orders dated 04/16/26 and the April 2026 Treatment Administration Record (TAR) showed the resident had active orders for both an air mattress and a pressureˆredistribution mattress from 04/16/26 through 04/19/26, and documentation reflected that both surfaces were in place from 04/16/26 through 04/18/26.An observation on 04/19/26 at 11:30 A.M. revealed Resident #17 was on a regular pressureˆredistributing mattress, not an air mattress. At the time of the observation, licensed Practical Nurse (LPN) #552 confirmed that only a pressureˆredistributing mattress was in use, despite the presence of two conflicting mattress orders in the record. The air mattress order was discontinued following this observation and interview.This deficiency represents noncompliance investigated under Complaint Number 2606964.

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:	(X2) MULTIPLE CONSTRUCTION	(X3) DATE SURVEY COMPLETED
	365825	A. Building B. Wing	04/29/2026

NAME OF PROVIDER OR SUPPLIER	STREET ADDRESS, CITY, STATE, ZIP CODE
Grande Oaks	24579 Broadway Ave Oakwood Village, OH 44146

F 0919 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Make sure that a working call system is available in each resident's bathroom and bathing area. **NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** Based on observation, record review, and interview, the facility failed to ensure call lights were left in reach of residents. This affected one (Resident #41) of four residents reviewed for environmental concerns. The facility census was 42.Findings include:Record review of Resident #41 revealed she was admitted [DATE] with diagnoses including dementia, anxiety disorder, and chronic respiratory failure. Her Minimum Data Set (MDS) 3.0 assessment dated [DATE] revealed she needed substantial assistance from staff for bed mobility.Observation of Resident #41 on 04/19/26 at 10:08 A.M. revealed her call light was hanging from the bed rail outside of her reach on the right side. The right side had three pillows stacked preventing her from reaching the cord to pull the call light up into reach.Interview with Registered Nurse (RN) #518 on 04/19/26 at 10:38 A.M. confirmed the above observation. Following surveyor intervention, she placed the call light within resident reach.This deficiency represents non-compliance investigated under Complaint Number 2726820.

F 0921 Level of Harm - Minimal harm or potential for actual harm Residents Affected - Few	Make sure that the nursing home area is safe, easy to use, clean and comfortable for residents, staff and the public. Based on observations, interviews and facility policy review, the facility failed to ensure a clean, safe and homelike environment. This affected three (Residents #8, #29, and #36) of four residents reviewed for physical environment. The facility census was 42.Findings include:1. During an observation on 04/19/26 at 10:14 A.M., Resident #8's room had a large hole in the wall behind the head of the bed with multiple scrapes, scratches, and areas of missing paint. Walls, floors, and the nightstand surrounding the resident's room contained large brown- and yellow-colored dried splatter stains of unknown origin. The floor was visibly dirty and covered with food particles and debris. Interview on 04/19/26 at 10:20 A.M. with Registered Nurse (RN) #518 observed and verified the condition of Resident #8's room. 2. On 04/22/26 at 9:23 A.M., observation of Resident #29's room revealed the air conditioner unit's front cover was hanging off, and the vent cover was detached and lying on the floor. The floor had dirt marks and debris. A long curved gouge was present in the floor by the entrance door, caused by the door dragging. The door was very difficult to close. On 04/22/26 at 9:29 A.M., observation of Resident #36's room revealed the door was difficult to open. The floor was dirty with stains, dirt, and debris. The outlet supplying power to the television was missing its cover. The vent cover was partially detached. A small dent with crumbling wall material was observed above the baseboard near the room entrance. On 04/22/26 at 9:54 A.M., Director of Maintenance (DOM) #590 verified the door to Resident #36's room was hard to open, stating it had been removed previously to bring in a large bed. He stated the door could be repaired, but not immediately. DOM #590 also verified the missing outlet cover, the dented wall area, and the loose vent cover, stating he would address all items except the door, which would require additional time. On 04/22/26 at 9:58 A.M., DOM #590 verified conditions in Resident #29's room, including the difficulty closing the door and the resulting damage to the floor. He confirmed the AC unit cover and vent cover were off, stating the resident's bed had struck the units. On 04/22/26 between 10:08 A.M. and 10:20 A.M., the Housekeeping Supervisor (HSKS) #505 verified the floor conditions in Residents #29's and #36's rooms. HSKS #505 stated the facility had experienced staffing issues but was fully staffed that week and working to catch up. Reviewed policy Safe and Homelike Environment, revised 06/01/24 revealed housekeeping and maintenance services will be provided as necessary to maintain a sanitary, orderly, and comfortable environment. This deficiency represents non-compliance investigated under Master Complaint Number 2961312 and Complaint Numbers 1320285 (OH001320285), and 1320283 (OH00166923).
