

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:  435109	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED  04/25/2025
NAME OF PROVIDER OR SUPPLIER  Firesteel Healthcare Center		STREET ADDRESS, CITY, STATE, ZIP CODE  1120 East 7th Avenue Mitchell, SD 57301	

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0554</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Allow residents to self-administer drugs if determined clinically appropriate.</p> <p><b>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 51471</b></p> <p>Based on observation, interview, record review, and policy review, the provider failed to ensure two of two sampled residents (31 and 104) were assessed for the ability to safely self-administer medications delivered through nebulizer machines (device that converts liquid medication into an inhalable mist).</p> <p>Findings include:</p> <p>1. Observation and interview on 4/23/25 at 8:45 a.m. with resident 31 revealed:</p> <p>*She confirmed the staff would:</p> <p>-Have set up the nebulizer (neb) medication (med) for her to administer on her own.</p> <p>-Not have stayed in the room to ensure she had taken all the medication.</p> <p>*She stated, They come back and check on me to make sure I finished it.</p> <p>*The neb machine remained on the table stand with the tubing and the reservoir cup (medication chamber) disassembled.</p> <p>*The tubing and reservoir cup appeared to have been cleaned out.</p> <p>Observation and interview on 4/24/25 at 7:32 a.m. with certified medication aide (CMA) DD while administering a neb med to resident 31 revealed she:</p> <p>*Placed the med in the reservoir cup of the neb tube assembly.</p> <p>*Placed the neb machine on the table stand next to resident 31's recliner, turned it on, and handed the neb tube assembly to the resident.</p> <p>*Left the resident's room, went back to her medication cart and continued to pass meds to other residents.</p> <p>-The resident was not visible to her while she was back at her med cart.</p> <p>(continued on next page)</p>

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0584</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>-The drywall in that area was removed to find an uncovered pipe in the cinderblock wall.</p> <p>-That uncovered pipe was potentially the source of the sewer odor.</p> <p>-The pipe was fixed, and the wall was repaired.</p> <p>Observation and interview on 4/23/25 at 9:40 a.m. with resident 30 in the therapy gym revealed:</p> <p>*There was a distinct sewer odor near the entrance to the therapy gym. The odor grew stronger in the therapy gym.</p> <p>*Resident 30 was utilizing a piece of gym equipment.</p> <p>-She indicated that the odor had been there for years.</p> <p>-Her room was near the rehab dining room, and she sometimes could smell the sewer odor near her room.</p> <p>Review of the provider's online maintenance log revealed:</p> <p>*There were seven different work orders provided for review regarding the sewer odor from January through March 2025 including:</p> <p>-Work order #3609 titled sewer smell submitted on 1/30/25 read, Heater units checked and put water in traps to ensure that no traps are empty. [Ran] water in sinks and in bathtub as well to ensure no sewer gases are coming back out of the plumbing.</p> <p>-Work order #3689 titled Sewer Smell submitted on 2/27/25 read, Sink with no water in p-trap allowing sewer [gases] to escape.</p> <p>-Work order #3720 titled sewer smell submitted on 3/10/25 read, checked Room and did not note any odd smells but will contact vendor to smoke test.</p> <p>-Work order #3724 titled sewer smell submitted on 3/11/25 read, Contacted [vendor] to smoke test vents on building but they cannot be out for another week as they are booked up. Drains checked, no problems noted, there is an odor but cannot smell sewer gases.</p> <p>-Work order #3729 titled sewer smell submitted on 3/12/25 at 7:58 a.m. read, Still waiting for vendor to come smoke test, will check drains. The affected locations were documented as the 300 desk area [the nurse's desk outside the physical therapy gym], hallway into therapy, therapy, [staff member's] office, and OP [outpatient] therapy room.</p> <p>-Work order #3731 titled sewer smell submitted on 3/12/25 at 9:34 a.m. read, Still waiting for vendor. Checked room and smell is not as bad as it is being described. Will have Housekeeping spray rooms. Let staff know multiple times that we are waiting for the vendor.</p> <p>-Work order #3776 titled ceiling tile submitted on 3/24/25 read, ceiling tile was removed out of place in the OP room where the recent sewer gas/smoke test was completed.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0656</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>Interview on [DATE] at 4:23 p.m. with MDS coordinator D revealed that resident 19's foot cradle was implemented a few months ago. The former wound care nurse implemented the device but had not updated the resident's care plan.</p> <p>2. Interview on [DATE] at 8:43 a.m. with resident 33 revealed:</p> <p>*She indicated that her normal eating habits included skipping breakfast. She said she never ate breakfast.</p> <p>*While lying in bed, she utilized a hiking water bladder (a flexible container for holding liquids) with a straw that rested on her bedside table.</p> <p>-She believed she did not have the strength to pick up the normal water bottle from her bedside table, so she had her daughter bring in the water bladder to use for fluid intake while she was in bed.</p> <p>Review of resident 33's EMR revealed her current comprehensive care plan did not include her preference of skipping breakfast or her use of the water bladder.</p> <p>Interview on [DATE] at 9:53 a.m. and 11:29 a.m. with registered nurse (RN) K revealed:</p> <p>*She was aware that resident 33 usually skipped breakfast. The resident kept snacks in her room to consume as she wished.</p> <p>*She was aware that the resident used the water bladder for fluid intake while in bed.</p> <p>*She had the ability to add items to the resident's care plan, but the intake team (consisting of one of the resident care managers and the social worker) and the MDS coordinator usually managed the care plan.</p> <p>*Normal dietary items to include on the care plan included the resident's diet order, preferences and allergies, and nutrition supplements.</p> <p>3. Observation and interview on [DATE] at 3:47 p.m. of resident 85 with licensed practical nurse (LPN) N and RN K revealed:</p> <p>*Both of resident 85's lower legs were wrapped with compression bandages.</p> <p>*LPN N and RN K confirmed that resident 85 had venous stasis wounds (open sores that develop on the skin due to impaired blood circulation in the veins) on both of his lower legs and was to use Unna boots (compression bandages) for those wounds.</p> <p>Review of resident 85's current comprehensive care plan revealed:</p> <p>*His care plan included that he had actual impairment to skin integrity of the neck r/t [related to] surgical wound.</p> <p>*The care plan did not include that he had wounds on both of his lower legs or that he was to use the Unna boots.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0867</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>Set up an ongoing quality assessment and assurance group to review quality deficiencies and develop corrective plans of action.</p> <p>46453</p> <p>Based on interview, record review, and policy review, the provider failed to identify, implement, and document quality assurance and performance improvement (QAPI) plans of action to correct identified infection control deficiencies for three of three months reviewed (January through April 2025) related to hand hygiene and personal protective equipment (PPE) compliance benchmarks.</p> <p>Findings include:</p> <p>1. Observations and interviews made throughout the survey from 4/22/25 through 4/25/25 revealed that there were issues regarding hand hygiene and PPE compliance, which potentially contributed to the outbreak of a gastrointestinal illness that affected several residents and staff. Refer to F880.</p> <p>2. Interview and record review on 4/25/25 at 11:19 a.m. with administrator A regarding their quality assurance and performance improvement (QAPI) activities revealed:</p> <p>*Administrator A reviewed their QAPI data on an Excel spreadsheet with the surveyor.</p> <p>*Their QAPI committee met at least monthly to review data and quality measures.</p> <p>-During their meetings, they reviewed the previous month's audits and data.</p> <p>-For example, their January reports reflected data gathered in December.</p> <p>*They identified infection control as a performance measure to track monthly.</p> <p>-Data gathered included hand hygiene and PPE compliance.</p> <p>-Audits were completed monthly to track performance.</p> <p>*Their plan of correction (POC) for those areas included continuing to educate staff about the importance of hand hygiene and following PPE guidelines.</p> <p>*It was identified that their POC did not include actions beyond educating staff, and their compliance percentages continued to fall below their identified benchmarks each month from January to April 2025 (that data would have reflected December 2024 through March 2025).</p> <p>*They had not tried any other documented methods to increase hand hygiene and PPE compliance to improve their identified infection control concerns.</p> <p>3. Review of the provider's QAPI report records revealed:</p> <p>*Their compliance benchmark for both hand hygiene and PPE was set at 95% on one page of their QAPI report, but was set at 100% on a different page.</p> <p>(continued on next page)</p>		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:  435109	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED  04/25/2025

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0867</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Some</p>	<p>*According to their 2025 data, their monthly compliance percentages were as follows:</p> <p>-For hand hygiene: 90% compliance for January, February, March, and April.</p> <p>-For PPE: 85% in January, February, and March, and 90% in April.</p> <p>*Notes from their January 2025 QAPI meeting included:</p> <p>-Hand hygiene: Investigation: Hand [Hygiene] was at about 90% this month. At times, it was noted that staff did not use hand sanitizer after coming out of rooms each time. Plan of Correction: ICP [infection control program] continue to educate staff [of] the importance of hand [hygiene] and using hand sanitizer after each room. Use of soap and water after 3 times of hand sanitizer usage.</p> <p>--There was a section for Outcome, but nothing was noted in that section.</p> <p>-PPE compliance: Investigation: PPE compliance was at about 85% this month. Staff would go into COVID rooms with surgical masks on and not N95 [a specialized face mask]. Gowns not being worn at all times during cares in EBP [enhanced barrier precautions] rooms. Plan of Correction: ICP continue to educate staff [of] the importance of the signs on the doors and wearing the correct PPE. List of COVID positive residents were placed at the [nurse's] station to make staff more aware of which residents required the special quarantine precautions. Outcome: Once staff were reminded on the importance of correct PPE usage, this improved.</p> <p>*Notes from their February 2025 QAPI meeting included:</p> <p>-The hand hygiene notes were identical to January's notes.</p> <p>-PPE compliance: Investigation: PPE compliance was at about 85% this month. Gowns not being worn at all times during cares in EBP rooms. Plan of Correction: ICP continue to educate staff [of] the importance of the signs on the doors and wearing the correct PPE.</p> <p>--There was a section for Outcome, but nothing was noted in that section.</p> <p>*Notes from their March 2025 QAPI meeting included:</p> <p>-The hand hygiene notes were identical to January's and February's notes.</p> <p>-The PPE compliance notes were identical to February's notes.</p> <p>-PPE Plan of Correction: ICP continue to educate staff [of] the importance of the signs on the doors and wearing the correct PPE. Outcome: EBP rooms audited and precautions taken down if did not meet criteria to help with importance of PPE.</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>Provide and implement an infection prevention and control program.</p> <p><b>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY**</b> 46453</p> <p>Based on South Dakota Department of Health (SD DOH) complaint intake review, observation, interview, record review, and policy review, the provider failed to ensure proper infection control practices were followed regarding:</p> <p>*Hand hygiene practices by staff members BB, GG, and HH during two of two dining observations in two of three dining rooms.</p> <p>*Hand hygiene and personal protective equipment (PPE) use by three of three staff observed (L, M, and BB) during personal cares for one of one sampled resident (41), personal cares for one of one sampled resident (33) on contact precautions (which indicated staff should have worn gowns and gloves), and assisting with resident transportation for two of two sampled residents (33 and 85).</p> <p>Failure to follow infection control practices potentially contributed to a norovirus [a highly contagious virus that causes nausea, vomiting, and diarrhea] outbreak in April 2025 which included three residents (18, 40, and 76) with confirmed norovirus infections and at least forty-two additional residents (1, 2, 3, 4, 12, 13, 14, 16, 22, 23, 24, 25, 29, 30, 31, 33, 34, 35, 36, 41, 42, 43, 45, 53, 58, 60, 64, 65, 67, 68, 69, 77, 78, 79, 80, 85, 93, 99, 100, 107, 258, and 259) with identified gastrointestinal (GI) symptoms.</p> <p>Findings include:</p> <p>1. Review of the 4/16/25 SD DOH complaint intake form revealed:</p> <p>*An anonymous email reported a concern that the provider had a severe outbreak of norovirus.</p> <p>*The anonymous reporter was concerned the provider was not monitoring hand washing, sanitation, [and] dishwashing.</p> <p>*The writer was fearful for their family member that resided at the facility.</p> <p>2. Review of a separate SD DOH complaint intake received on 4/16/25 revealed:</p> <p>*The complainant reported that resident 107 was recently hospitalized and had to be admitted to the intensive care unit (ICU).</p> <p>Review of resident 107's electronic medical record (EMR) revealed:</p> <p>*On 4/9/25, she experienced vomiting, diarrhea, weakness, and confusion. She was unable to speak coherently.</p> <p>*On 4/9/25 around 4:45 p.m., she was sent to the local emergency room for evaluation.</p> <p>-She was then admitted to the ICU for a diagnosis of pneumonia.</p> <p>(continued on next page)</p>

<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>*She continued to experience diarrhea throughout her hospitalization .</p> <p>*She returned to the facility on [DATE].</p> <p>3. Observation on 4/22/25 at 3:51 p.m. of certified nurse aide (CNA) M and CNA/certified medication aide (CMA) BB performing personal cares for resident 41 revealed:</p> <p>*Both CNAs performed proper hand hygiene before putting on clean pairs of gloves.</p> <p>*Resident 41 had been incontinent of bowel, and they cleaned her up and removed the soiled brief.</p> <p>*Without removing her gloves or performing hand hygiene, CNA/CMA BB walked over to resident 41's wardrobe and touched the door handles, rummaged around in the wardrobe, and grabbed a clean brief.</p> <p>*She continued to assist resident 41 with putting on the clean brief with those same soiled gloves on.</p> <p>*Both CNAs kept on their same pair of soiled gloves throughout the process of changing resident 41's brief, getting her cleaned up, and redressing resident 41.</p> <p>*Both CNAs then removed their gloves and did not perform hand hygiene.</p> <p>*With their unclean hands, they touched:</p> <ul style="list-style-type: none"> <li>-The resident's sling used for the full body lift.</li> <li>-The full body lift.</li> <li>-The resident's positioning pillow.</li> <li>-The resident's wheelchair.</li> <li>-The door handle to exit the room.</li> </ul> <p>-CNA M also touched the resident's water cup, held the straw between her right index and middle fingers, and helped resident 41 take a drink of water.</p> <p>*CNA/CMA BB wrapped up the trash and walked away with it down the hallway.</p> <ul style="list-style-type: none"> <li>-After she came back, she brought the full body lift out into the hallway and cleaned it.</li> </ul> <p>*Neither of them were observed to have performed hand hygiene after assisting the resident.</p> <p>4. Interview on 4/22/25 at 4:10 p.m. with both CNA M and BB about the above observation revealed:</p> <p>*Neither of them realized they had missed several opportunities for hand hygiene and changing their gloves.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>*CNA M questioned how soon she should have performed hand hygiene after removing her gloves as she explained she came out here [the hallway] to do that, is that not soon enough?</p> <p>-The surveyor explained that she touched the resident's water cup and drinking straw after removing her gloves and had not yet performed hand hygiene after assisting the resident with personal care. Her contaminated hands potentially increased the risk of spreading infection.</p> <p>-She agreed she had done that and promptly walked away from the conversation.</p> <p>5. Observation on 4/22/25 at 4:41 p.m. of CNAs L and M in resident 33's shared room revealed:</p> <p>*There was a sign on the door for Contact Precautions which explained what PPE each person entering the room was required to wear.</p> <p>-PPE was available and hanging on the door.</p> <p>*CNA M came out of resident 33's side of the room with no evidence that she had worn PPE while interacting with the resident.</p> <p>*CNA L came out of resident 33's side of the room with the full body lift and parked it in the hallway. She was not wearing any PPE.</p> <p>-She did not clean the lift.</p> <p>*She did not put on any PPE and then went back into resident 33's side of the room.</p> <p>*She came back out of the resident's room, wearing one glove on her left hand and was holding a small bag of trash. There did not appear to be any PPE in the small trash bag.</p> <p>*She was holding the bag of trash while she was pushing resident 33 in her wheelchair down the hallway.</p> <p>-She was touching the left wheelchair handle with the same hand that she was holding the trash with.</p> <p>*She wheeled the resident all the way down the 400-hallway and turned towards the rehab dining room.</p> <p>*By 4:56 p.m., no staff had come back to clean the lift.</p> <p>6. Interview on 4/22/25 at 4:58 p.m. with licensed practical nurse (LPN) N revealed:</p> <p>*She confirmed that resident 33 had an order for contact precautions, but she was not sure why the resident was on contact precautions.</p> <p>-She wondered if it was from the gastrointestinal (GI) bug that went through the building for the past several weeks.</p> <p>(continued on next page)</p>		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:  435109	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED  04/25/2025

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>-When reviewing resident 33's record, she confirmed that the resident had diarrhea and vomiting the previous week.</p> <p>*She explained that contact precautions were implemented for residents known or suspected to be infected with infectious agents transmitted [from] person-to-person.</p> <p>*For contact precautions, she expected staff to wear at least a gown and gloves when providing care to the resident, even for transferring.</p> <p>-If staff were physically touching the resident, she expected staff to wear PPE for infection control purposes.</p> <p>*She indicated that the contact precautions for resident 33 were no longer necessary since her GI symptoms had subsided several days ago.</p> <p>-She discontinued that order for contact precautions in resident 33's electronic medical record (EMR).</p> <p>*She did not know exactly why the contact precautions sign and the PPE were still on resident 33's door and guessed that someone may have forgotten to discontinue the precautions after she was symptom-free.</p> <p>*She expected staff to have followed the contact precautions signage and use the proper PPE or contact a nurse if there were any questions.</p> <p>7. Interview on 4/22/25 at 5:05 p.m. with CNA L revealed:</p> <p>*She could not remember how long she had been working at that facility.</p> <p>*When asked if she knew which resident in the shared room from the above observation was on contact precautions, she indicated that she did not know how to tell which resident in that room was on contact precautions.</p> <p>*She confirmed that neither she nor CNA M wore gowns while interacting with resident 33, they only wore gloves.</p> <p>*When asked if she knew what contact precautions meant, she said that they were supposed to wear gowns, gloves, and sometimes a face shield when interacting with the resident.</p> <p>*She said she also caught the GI bug that was going around the facility recently.</p> <p>*When asked why she did not follow the contact precautions as posted on the door and in the resident's orders, she said, I don't know, that's what I was trained to do, to just follow the other CNA.</p> <p>*When asked how often she was to clean the lift, she indicated that it was supposed to have been cleaned after each resident's use.</p> <p>(continued on next page)</p>

<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>-She still did not clean the lift after being informed that she had not cleaned the lift after taking it out of the resident's room.</p> <p>8. Observation on 4/22/25 at 5:11 p.m. revealed LPN N was removing the contact precautions sign and PPE off resident 33's door.</p> <p>9. Observation on 4/22/25 from 5:34 p.m. to 5:40 p.m. in the rehab dining room revealed:</p> <p>*CNA/CMA BB was sitting between two residents (41 and 56) to help them eat supper.</p> <p>*With her bare hands, she touched her hair braids to push them back behind her shoulders.</p> <p>*Without performing hand hygiene, she continued to help the two residents eat their meals.</p> <p>-She was taking straws out of their wrappers and placing the straws into the residents' beverages, touching the resident's silverware handles, squeezing condiments out of packets, and wiping the residents' mouths with their napkins.</p> <p>50915</p> <p>10. Observation on 4/22/25 at 5:49 p.m. of the evening meal on the memory care unit (MCU) revealed:</p> <p>*Residents were not assisted with cleaning their hands before their meal.</p> <p>*CNA HH did not sanitize her hands before she passed the residents' meal trays.</p> <p>*She was observed coughing into her hand, she did not sanitize her hands after coughing, then she delivered the resident's meal tray.</p> <p>*There was a potentially contaminated rehabilitation cone device on the table.</p> <p>-A resident grabbed the cone and appeared to have been trying to take a drink from the cone as he picked it up and brought it to his mouth.</p> <p>-CNA HH noticed this and gently removed the potentially contaminated cone from his hands. She continued serving meal trays without performing hand hygiene.</p> <p>*She served nine residents their meal trays and did not sanitize her hands.</p> <p>11. Observation on 4/23/25 at 9:29 a.m. of the morning meal service on MCU revealed:</p> <p>*Some residents were sitting at the table prior to meal service.</p> <p>*CNA GG did not perform hand hygiene before assisting residents with eating.</p> <p>*CNA GG was observed assisting a resident to eat after the resident had coughed.</p> <p>-The resident was not offered hand sanitizer or a hand wipe.</p> <p>(continued on next page)</p>

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>*She reported the outbreak was facility-wide and included many residents and staff members.</p> <p>*She reported if she were assisting residents to eat, she would sanitize her hands before assisting residents, then after assisting them before she assisted another resident.</p> <p>16. Interview on 4/25/25 at 10:15 a.m. with resident care manager registered nurse (RN) G revealed:</p> <p>*She was a the provider's infection preventionist.</p> <p>*There was an outbreak of norovirus in the facility during April 2025.</p> <p>*They tested three residents, each from different wings of the facility, all were positive for norovirus.</p> <p>*After that initial testing, all residents with GI symptoms (nausea, vomiting, diarrhea) were assumed to have norovirus and were tracked for infection control purposes.</p> <p>*Residents with symptoms were placed on contact precautions to prevent further spread of the virus.</p> <p>*Residents remained on contact precautions for 24 hours after symptoms stopped.</p> <p>17. Interview on 4/25/25 at 10:51 a.m. with director of nursing services (DNS) B and division director of clinical services (DDCO) C revealed:</p> <p>*DNS B recently started her position at the facility on 4/7/25.</p> <p>*Since the resident GI symptoms started on 4/8/25, she was fully aware of the GI outbreak.</p> <p>-In her time at that facility, she noted concerns in infection control such as hand hygiene.</p> <p>*On 4/8/25, residents who were experiencing diarrhea and vomiting were placed on contact precautions.</p> <p>*The staff collected and sent stool cultures to the laboratory for testing from three residents that had GI symptoms (residents 18, 40, and 76). Those residents resided in different areas of the facility. On 4/12/25, those stool culture results came back positive for norovirus.</p> <p>*Both DNS B and DDCO C appeared disappointed when they were informed about the above observations.</p> <p>-They expected staff to have followed the provider's policies on hand hygiene, glove use, and contact precautions.</p> <p>*A total of 45 residents were affected.</p> <p>-The census at the time of the survey was 104.</p> <p>18. Review of the provider's Line listings for infections by resident tracking sheet revealed:</p> <p>(continued on next page)</p>

NAME OF PROVIDER OR SUPPLIER  Firesteel Healthcare Center		STREET ADDRESS, CITY, STATE, ZIP CODE  1120 East 7th Avenue Mitchell, SD 57301	
For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.			
(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>*Between 4/6/25 and 4/14/25, a total of 45 residents (1, 2, 3, 4, 12, 13, 14, 16, 18, 22, 23, 24, 25, 29, 30, 31, 33, 34, 35, 36, 40, 41, 42, 43, 45, 53, 58, 60, 64, 65, 67, 68, 69, 76, 77, 78, 79, 80, 85, 93, 99, 100, 107, 258, and 259) had been identified to have GI symptoms.</p> <p>19. Review of the provider's March 2018 handwashing/hand hygiene policy revealed:</p> <p>*Policy statement: This Center considers hand hygiene the primary means to prevent the spread of infections.</p> <p>*Procedure:</p> <p>-1. Personnel are trained and regularly in-serviced on the importance of hand hygiene in preventing the transmission of healthcare-associated infections.</p> <p>-2. Personnel follow the handwashing/hand hygiene procedures to help prevent the spread of infections to other personnel, residents, and visitors.</p> <p>20. Review of the provider's May 2015 Initiating Transmission-Based Precautions policy revealed:</p> <p>*Policy Statement: Transmission-Based Precautions are initiated when there is reason to believe that a resident has a communicable infectious disease.</p> <p>-Transmission-Based Precautions may include Contact Precautions, Droplet Precautions, or Airborne Precautions.</p> <p>*Procedure:</p> <p>-1. If a resident is suspected of, or identified as, having a communicable infectious disease, the Charge Nurse or Nursing Supervisor notified the Infection Preventionist and the resident's Attending Physician for appropriate Transmission-Based Precautions.</p> <p>- 4. Transmission-Based Precautions remain in effect until the Attending Physician or Infection Preventionist discontinues them, which occur after pertinent criteria for discontinuation are met.</p> <p>-5. When Transmission-Based Precautions are implemented, the Infection Preventionist or designee:</p> <p>--a. Validates protective equipment (i.e., gloves, gowns, masks, etc.) is maintained near the resident's room so that everyone entering the room can access what they need;</p> <p>--b. Posts the appropriate notice on the room entrance door and on the front of the resident's chart so that all personnel will be aware of precautions, or be aware that they must first see a nurse to obtain additional information about the situation before entering the room. This Center's process for notification is signage .</p> <p>-6. In an emergency, the Infection Preventionist, [Executive Director], and/or Medical Director have the administrative authority, accountability, and responsibility to:</p> <p>--a. Institute actions necessary to control or prevent infections within the Center;</p> <p>(continued on next page)</p>

<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>--b. Notify the health department of reportable diseases, as appropriate;</p> <p>--c. Initiate isolation precautions;</p> <p>--d. Obtain laboratory specimens;</p> <p>--e. Restrict or ban admissions;</p> <p>--f. Restrict or ban visitations;</p> <p>--g. Implement other measures as necessary to prevent and control infections within the Center.</p> <p>21. Review of the provider's March 2025 Transmission-Based Precautions (Isolation) policy revealed:</p> <p>*Policy Statement: Transmission-Based Precautions (previously referred to as isolation precautions) are implemented for residents known to be, or suspected of being, infected with infectious agents.</p> <p>*Procedure:</p> <p>-1. Use Transmission-Based Precautions in addition to Standard Precautions.</p> <p>-2. The four types of Transmission-Based Precautions may be used alone, or in combination for diseases that have multiple routes of transmission. Determination of use is based on how the infectious agent is transmitted.</p> <p>--Contact precautions.</p> <p>--Droplet precautions.</p> <p>--Airborne precautions.</p> <p>--Enhanced barrier precautions.</p> <p>-3. The need to implement Transmission-Based Precautions is determined by the [facility's] Infection Preventionist (IP), Director of Nursing and/or consultation with the local health department. Precautions are based on CDC [Centers for Disease Control and Prevention] guidelines. Precautions are the least restrictive possible for the resident.</p> <p>-4. The facility documents in the resident's medical record the rationale for the type of transmission-based precautions selected as well as the length of time the precautions is maintained.</p> <p>-5. Communication of Transmission-Based Precautions is accomplished with the pertinent signage and verbal reports to personnel and visitors.</p> <p>-6. Residents on TBP [Transmission-Based Precautions], apart from EBP [Enhanced Barrier Precautions], should remain in their room for the duration of precautions, except for medically necessary care or resident choice.</p> <p>(continued on next page)</p>

<p>F 0880</p> <p>Level of Harm - Actual harm</p> <p>Residents Affected - Some</p>	<p>-7. Indirect transmission of infectious agents can occur through contact with resident care equipment. Whenever possible, personal care items such as thermometers, stethoscopes, blood pressure cuffs and gait belts will be dedicated for use by the resident needing contact, droplet, or airborne precautions. All reusable items, including glucometers and other point-of-care devices are cleaned using appropriate disinfectant after using the devices with individual residents.</p> <p>*Contact Isolation Precautions:</p> <p>-Contact, or touch, is the most common and most significant mode of transmission of infectious agents. Contact transmission can occur by directly touching the resident, through contact with the resident's environment, or by using contaminated gloves or equipment.</p> <p>-Personnel having contact with the infected resident should wear gloves and a gown.</p> <p>-Prior to leaving the resident's room, gown and gloves are removed and hand hygiene performed.</p> <p>-Options for residents on contact precautions may include a private room, cohorting with another infected or colonized resident or sharing a room with a resident with limited risk factors (no immunosuppression, IVs, indwelling catheters or open skin lesions).</p> <p>-Residents with wound drainage, fecal incontinence, or diarrhea, that cannot be contained, should be placed on contact precautions until a specific organism for the origin of the medical issue is identified.</p>
