F 0812	Procure food from sources approved or considered satisfactory and store, prepare, distribute and serve food in accordance with professional standards.			
Level of Harm - Minimal harm or potential for actual harm	50408			
Residents Affected - Some	Based on policy review, refrigerator temperature logs, observation, and interview, the facility failed to ensure food was stored, handled, prepared, and served under sanitary conditions, when food was found unlabeled and undated, baking pans contained carbon buildup, a grease trap under the stove was found with aluminum foil torn and with a large amount of food debris, and when the walk-in cooler temperatures were consistently above 41 degrees. The census was 37 with 34 of those residents receiving a meal tray from the kitchen.			
	The findings include:			
	Review of the undated facility policy titled, Labeling and Dating, revealed .opened foods shall be clearly labeled .Food items to be labeled and dated include .items that are opened and stored for later use .Name of food item .Discard Date .			
	Review of the undated facility policy titled, Cleaning Standards, revealed .Food contact surfaces, non-food contact surfaces, equipment, pans and utensils must be kept clean at all times. This includes but not limited to free of grease deposits, food residue, dust and other soil accumulation/debris.			
	Review of the undated facility policy titled, Freezers and Refrigerators, revealed This facility will ensure safe refrigerator and freezer maintenance, temperatures, and sanitation .Acceptable temperatures should be 35 degrees to 41 degrees F (Fahrenheit) for refrigerators .Dietary staff must report unacceptable .refrigerator temperatures to the dietary manager immediately .The Dietary Manager will take immediate action if temperatures are out of range .			
	Review of the Refrigerator Temperature Log form dated 4/2025, revealed the walk-in cooler temperatures were documented as follows:			
	a. 4/1/2025 PM: 46 degrees			
	b. 4/9/2025 PM: 48 degrees			
	c. 4/10/2025 PM: 46 degrees

	3. Observations of the walk-in cooler in the kitchen on 5/18/2025 at 10:30 AM and at 3:20 PM, revealed a thermometer reading of 52 degrees.		
	Observations in the kitchen beginning on 5/18/2025 at 10:30 AM, 3:20 PM, and 5/19/2025 at 10:00 AM, revealed the following:  a. An open large clear bag with white powder unlabeled and undated sitting on top of a flour bin container.		
	b. 8 large rectangular baking pans	with carbon build-up.	
	c. A grease trap drawer under the stove with excessive tearing of aluminum foil with a black plastic lid and excessive food debris.		
	During an interview on 5/19/2025 at 7:42 AM, the Regional Certified Dietary Manager (CDM) revealed the facility had purchased a new refrigerator and threw all of the food away that was in the cooler.		
	During an interview on 5/19/2025 at 10:00 AM, the Regional CDM and the CDM confirmed the clear bag of white powder was thickening powder for drinks and should not been left on top of the flour bin unlabeled and undated. The Regional CDM confirmed the grease trap under the stove was filled with food debris and the plastic lid could have been a fire hazard. The Regional CDM and the CDM confirmed 8 large rectangular baking pans had carbon build-up and should not have been used.		
	During an interview on 5/19/2025 at 11:10 AM, the Regional CDM confirmed that the food in the walk-in cooler should have been thrown away when the walk-in cooler temperatures were consistently above the appropriate temperatures.
