| F 0686   | Provide appropriate pressure ulcer  | care and prevent new ulcers from dev             | eloping.                                    |  |
| Level of Harm - Minimal harm or potential for actual harm  | **NOTE- TERMS IN BRACKETS F   | HAVE BEEN EDITED TO PROTECT C                    | ONFIDENTIALITY** 48709                      |  |
| Residents Affected - Few   | Based on interview and record review, it was found that the facility failed to ensure that a resident received the necessary treatment and services, consistent with professional standards of practice, to promote healing, prevent infection and prevent new ulcers from developing for 1 of 89 sampled residents. Specifically, a resident with a pressure injury was not provided dressing changes for 12 days. Resident identifier: 129. |  |   |  |
|  | Findings include:   |  |   |  |
|  | Resident 129 was admitted to the facility on [DATE], and readmitted on [DATE] with diagnoses which included encephalopathy, bacteremia, fistula of intestine, colostomy, severe protein-calorie malnutrition, hypomagnesemia, hypocalcemia, vitamin D deficiency, anemia, chronic kidney disease stage 3, pressure ulcer of sacral region, depression, and adult failure to thrive.   |  |   |  |
|  | Resident 129's medical record was   | s reviewed from 7/8/24 through 7/16/24           |   |  |
|  | The Quarterly Minimum Data Set (MDS) dated [DATE] revealed resident 129 had a Brief Interview for Mental Status (BIMS) score of 14, which indicated a cognitive status of no impairment. It further indicated the presence of 1 unhealed stage 3 pressure ulcer.  |  |   |  |
|  | An Initial Admission Record Section 12 Skin Integrity dated 3/11/24 at 3:42 PM indicated an, open wound to coccyx.  |  |   |  |

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

|  | non-compliance. Resident identifier  | r: 217.   |                                     |  |
|  | Findings include:  |   |                                     |  |
|  | Resident 217 was admitted to the facility on [DATE] and readmitted on [DATE] with diagnoses that included cerebrovascular accident, right bundle branch block, heart failure, and major depressive disorder.   |   |                                     |  |
|  | Resident 217's medical record was reviewed from 7/8/24 through 7/16/24.  |   |                                     |  |
|  | On 9/27/23, the facility completed a Functional Performance Evaluation for resident 217. The evaluation indicated that the resident was unable to stand up from a seated position due to medical condition or safety concerns. The evaluation also indicated that the resident was dependent on staff to help him transfer to and from a bed to a chair. |   |                                     |  |
|  | On 9/29/23, a Weekly Skin Evaluation was completed for resident 217. The resident's skin was observed to have no bruising or wounds, and was documented to be warm, dry and intact.  |   |                                     |  |
|  | and bruised. L shoulder very swolled on shoulder and down inner and out  | On 9/30/23, a nurses note documented that at 6:10 PM, aide reported pt's (patient's) L (left) shoulder swolle and bruised. L shoulder very swollen, firm, looks like it/s (sic) further forward than R (right) Shoulder. Bruising on shoulder and down inner and outer upper arm. When I attempted to move arm, pt called out and flinched An X ray was subsequently ordered. |                                     |  |
|  | On 10/1/23, a nurses note documented that resident 217 returned from the emergency room with .finding a fracture of the left humeral surgical neck, including displaced greater and lesser tuberosity.   |   |                                     |  |
|  | On 10/1/23, the facility submitted form 358 to the State Survey Agency. The form indicated that resident was observed to have bruising on his left shoulder, and the resident had subsequently been sent to the emergency room for evaluation.   |   |                                     |  |

| F 0689<br>Level of Harm - Actual harm | On 10/4/23, the facility submitted form 359 to the State Survey Agency. The form indicated that during the course of the investigation, it was determined that CNA 4 used a sit to stand machine to transfer the resident from a chair into bed. CNA 4 stated that while transferring the resident, the resident was unable to bear weight causing his arms to move unward, but was able to finish the transfer. The resident was not noted to   |  |                  |
| Residents Affected - Few              | weight causing his arms to move upward, but was able to finish the transfer. The resident was not noted to be in any pain at that time. A unit manager indicated that on 9/30/23, she was made aware of bruising to resident 217's left shoulder. The resident had an X-ray completed which showed a fracture and was sent to the local emergency room for evaluation. In the emergency room, resident 217 had a confirmation X-ray completed that indicated a comminuted, impacted, and angulated fracture of the left humeral neck. secondary to CVA resident is non verbal and unable to voice how he is feeling. The resident was discharged back to the facility the same day due to poor prognosis secondary to CVA the hospital stated he is not a candidate for surgery at this time. Resident is to remain on hospice care with comfort measures. The facility determined that abuse/neglect was verified, as upon investigation it was determined that the fracture most likely occurred while [resident 217] was being transferred in the sit to stand and was unable to bear weight. |  |                  |
|                                       | The facility's investigation that accompanied form 359 was reviewed. The facility noted that on 9/28/23 CNA 4 worked with resident 217. Also on that day, CNA 3 reported bruising to SM 2. SM 2 reported that there were no complaints of pain from resident 217, and that he observed resident 217's bruising, but thought it was old. [Note: The weekly skin assessment inaccurately documented that there were no skin issues on 9/29/23 even though bruising had been observed the day prior.] The investigation also indicated that resident 217's bruising was not reported to management until 9/30/23, approximately 2 days after the bruising to resident 217's left shoulder was initially observed.   |  |                  |
|                                       | The following investigation was provided by the facility: Investigation [resident 217]. admitted: 10/2/2023, Admission DX (diagnoses): CVA (cerebrovascular accident), Right bundle branch block, heart failure, MDD (major depressive disorder).  |  |                  |
|                                       | REPORT: [Staff member (SM) 1] phoned to this DON (Director of Nursing) on 9/30/2023 1833 (6:33 PM) Left shoulder with bruising and swollen, change in ROM (Range of Motion). Provider and family made aware order in place for hospital transfer to verify the X ray result.   |  |                  |
|                                       | He did come back on 10/1/2028 (sic) with written report of fracture to the left humeral surgical neck. He is not a surgical candidate at this time secondary to poor health condition. He will remain on hospice care PRN (as needed) pain medication and change of condition charting in place.   |  |                  |
|                                       | INVESTIGATION:   |  |                  |
|                                       | DON came to the building on Sunday 10/1/2023. Multiple staff members were interviewed that worked with resident. [Certified Nursing Assistant (CNA) 3) CNA reported that on Tuesday morning they went into [resident 217's] room where the sit to stand was noted to be in the room.   |  |                  |
|                                       | (continued on next page)   |  |                  |

| F 0790  | Provide routine and 24-hour emerg  | ency dental care for each resident.                      |   |
| Level of Harm - Minimal harm or potential for actual harm | **NOTE- TERMS IN BRACKETS H  | HAVE BEEN EDITED TO PROTECT CO                           | ONFIDENTIALITY** 47431                      |
| Residents Affected - Few                                  | Based on observation, interview and record review it was determined, for 1 of 89 sampled residents, that the facility did not provide or obtain outside resources for routine and emergency dental services to meet the needs of the residents. Specifically, a resident was not provided dental services after requesting to see one. Resident identifier: 38.  |  |   |
|   | Findings include:  |  |   |
|   | Resident 38 was admitted to the facility on [DATE] and readmitted on [DATE] with diagnoses which included fibromyalgia, systemic lupus erythematosus, chronic pain syndrome, depression, generalized anxiety, and cognitive communication deficit.   |  |   |
|   | On 7/10/24 at 1:32 PM, an interview was conducted with resident 38. Resident 38 stated that she has not seen a dentist and would like to see one. Resident 38 stated that she has several missing teeth, and it is hard for her to chew.   |  |   |
|   | Resident 38's medical record was reviewed 7/8/23 through 7/16/24.  |  |   |
|   | A quarterly Minimum Data Set (MDS) assessment dated [DATE] revealed that resident 38 had a broken or loosely fitting full or partial denture, and mouth or facial pain, discomfort or difficulty with chewing.   |  |   |
|   | On 3/11/24 at 8:39 AM, a MDS progress note revealed . She has missing her own natural upper teeth, missing upper partial plate, her own lower teeth and having chewing difficulty Requesting to see dentist. Will inform UM [unit manager] & SS [social service] .   |  |   |
|   | On 7/16/24 at 1:05 PM, an interview was conducted with registered nurse (RN) 1. RN 1 stated if a resident makes a request for a dental appointment, she would contact Social Services (SS). RN 1 stated that SS is the one that would set up any dental appointment.   |  |   |
|   | On 7/16/24 at 3:00 PM, an interview was conducted with Social Services Director (SSD). The SSD stated that she was not aware of the MDS progress note from 3/11/24, where resident 38 was requesting to see t dentist. The SSD stated that, the MDS coordinator should have sent her a message. The SSD stated she, can't say who dropped the ball on this, but the referral was missed and resident 38 did not get a dental appointment set up. |  |   |

| F 0801  Level of Harm - Minimal harm or potential for actual harm | and nutrition service, including a qu  | ropriate competencies and skills sets t<br>ualified dietician. | o carry out the functions of the food       |
| Residents Affected - Some   | Based on interview, the facility did to employ a clinically qualified full-time dietitian or another clinically qualified nutrition professional to serve as the director of nutrition services. Specifically, the facility did not employ a full time Registered Dietitian (RD) and the Dietary Manager (DM) did not meet the requirements to serve as the director of food and nutrition services.   |  |   |
|   | Findings include:  |  |   |
|   | On 7/8/24 at 8:48 AM, an interview was conducted with the DM. The DM stated she had not completed the required certification to work as the dietary manager. The DM stated the facility had a contracted RD that was at the facility on Mondays, Tuesdays, and Thursdays, and that she was always available by phone.  On 7/16/24 at 4:02 PM, a second interview was conducted with the DM. The DM stated she had not completed a course in food service safety and management, a Certified Dietary Manager course, a certified food service manager course, or a nationally recognized certification or associates degree or higher in food service and safety. |  |   |
