

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 475045	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED 11/06/2024
NAME OF PROVIDER OR SUPPLIER Woodridge Nursing Home		STREET ADDRESS, CITY, STATE, ZIP CODE 142 Woodridge Drive Barre, VT 05641	

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0600</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Protect each resident from all types of abuse such as physical, mental, sexual abuse, physical punishment, and neglect by anybody.</p> <p>50431</p> <p>Based on interview and record review, the facility failed to ensure two residents [Resident #73, and Resident #84] of three sampled residents remained free from physical abuse. Findings include:</p> <p>Per record review of Resident #73's progress notes, on 4/1/24 at approximately 1:00 PM, Resident #25 entered Resident #73's room and struck Resident #73. Resident #73 pushed the emergency light in his/her room and staff intervened. Resident #73 had their vital signs taken and was assessed by nursing staff. Per record review of Resident #73's progress notes, the resident sustained scratches on the right side of his/her neck and right elbow and was shaken by the incident.</p> <p>An interview was conducted on 11/6/24 at 2:07 PM with LNA#1, who was the caregiver during the incident. LNA #1 stated the emergency light went off in Resident #73's room. LNA #1 ran down the hall and found Resident #25 at doorway of Resident #73's room. S/he was attempting to push through, and the two residents began fighting.</p> <p>Per record review of Resident #25's care plan, there are no updated interventions after the incident to discuss how to prevent further physical altercations with other residents or staff.</p> <p>An interview was conducted with the DON [Director of Nursing] on 11/6/24 at 3:59 PM. The DON [Director of Nursing] substantiated the incident and confirmed that Resident #73 was not free from abuse. The DON confirmed that Resident #25's care plan was not updated with any additional interventions following the incident with Resident #73.</p> <p>50336</p> <p>2. Per Nursing note dated on 8/19/2024, Resident #21 punched Resident #84 in the upper arm. Resident #21 then began using profanity toward Resident #84. Per Resident #84 medical record and care plan initiated on 5/26/2024 S/he is at risk for inappropriate interactions with other residents related to his/ her impaired cognition and history of resident to resident altercation on 4/21/2022. Resident #84 has the following Intervention dated 5/21/2021 Anticipate and meet The resident needs.</p> <p>Per observation of Resident #84 in the common area on 11/05/24 at 03:25 PM, this writer observed Resident #21 sit down next to Resident #84 and reached over and placed his/her hand on Resident #84's arm. Per observation there was no staff redirection. Staff did not attempt to separate the two residents or place in different areas of the room.</p> <p>(continued on next page)</p>

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0656</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Develop and implement a complete care plan that meets all the resident's needs, with timetables and actions that can be measured.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 50336</p> <p>Based on interview and record review the facility failed to revise a Resident's care plan to include interventions needed to prevent pressure injury for 1 out of 5 residents in the sample (Resident # 47) who was identified as a high risk for pressure injury. Findings include:</p> <p>Per record review Emergency Department notes dated 1/19/2024 Resident #47 fell and sustained a fractured right hip on 1/19/2024. S/He was treated for pain at the hospital then returned to facility for comfort focused care</p> <p>Per the MDS [Minimum Data Set - a comprehensive resident assessment tool] dated 1/30/2024, the Resident was identified as a high risk for pressure injury. The MDS Coordinator documented the following assessment [Resident #47] has no PI [pressure injury] at this time. Braden score of 14 [per facility definition the Braden Scale is a validated pressure injury risk assessment tool used by RNs (Registered Nurse) and LPNs (Licensed Practical Nurse) to assign a level of pressure injury risk to trigger appropriate interventions for pressure injury prevention]. [S/he] is at high risk for skin integ [integrity] due to her spell of illness, decreased mobility, and reliant on staff for repositioning . Per Resident #47 care plan dated 8/4/2023 'Resident is dependent for bed mobility. [S/He] requires assist of x2 to roll in bed .</p> <p>Per facility policy titled [NAME] Wound Care Protocol last reviewed 1/16/2024 the following interventions should be in place for those who are identified at risk for pressure injuries:</p> <ul style="list-style-type: none"> -Turning, Positioning -Re-position/turn in bed at least every two hours, more often as needed; avoid positioning directly on pressure areas. -After positioning, place a hand underneath the sacrum to determine if the sacrum offloaded. -Heel elevation -Elevate heels off all surfaces by placing pillows lengthwise under calves to Achilles tendon, using heel bolster. <p>A nursing assessment skin check dated 2/20/2024, reveals that Resident #47 was identified to have pressure injury in the form of a deep tissue injury (DTI) to his/her sacrum. According to the National Institute of Medicine (2015) a deep tissue injury (DTI) is a form of pressure injury that is deep purple or maroon in color, the area of skin may be intact skin or have a blood?filled blister due to damage of underlying soft tissue from pressure and/or shear. There is no evidence that the facility updated the care plan at that time or implemented frequent repositioning or offloading the sacrum. There were also no interventions to elevate the heels with pillows or heel bolsters to prevent pressure injury to the Resident #47's heels. There is no evidence of new interventions after actual pressure injury occurred on 2/20/2024, until 7/18/2024.</p> <p>(continued on next page)</p>		

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER: 475045	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED 11/06/2024

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)		
<p>F 0656</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Per nursing assessment skin check dated on 7/18/2024, Resident #47 was identified to have a second DTI to the right heel. Per physician orders dated 7/18/2024 Nursing order PI [pressure injury] prevention and bilateral black booties when in bed. LNA (Licensed Nursing Assistant) task documentation record and Resident #47's care plan reveals that the intervention to apply heel off-loading device was not initiated until 7/18/2024 again after the pressure injury developed. Per care plan the intervention to turn and reposition was not added until 8/7/2024, six months after the pressure injury occurred.</p> <p>Per review of Resident #47's care plan dated 8/14/2023, reveals the following focus At risk for further alteration in skin integrity/PI [related to/history] of pressure injury to the sacrum, [history] of pressure injury to (r) heel. Decreased mobility, requiring staff assistance with transfers and repositioning, weakness, poor PO intake and bowel /bladder incontinence . Interventions dated 1/23/24 include pressure reducing mattress and wheelchair cushion. There were no new interventions related to pressure injury prevention after the MDS that was completed on 1/30/2024 which identified Resident #47 as high risk for pressure injury.</p> <p>Per interview of the Unit Manager (UM) on 11/6/2024 at approximately 10:00 AM s/he confirmed that there was no documented evidence that Resident #47's care plan was updated to include the prevention measures stated in the facility policy related to specific sacral and heel pressure injury prevention. There was also no documented evidence that these interventions were implemented prior to 7/18/2024.</p>

<p>F 0699</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Provide care or services that was trauma informed and/or culturally competent.</p> <p>**NOTE- TERMS IN BRACKETS HAVE BEEN EDITED TO PROTECT CONFIDENTIALITY** 46135</p> <p>Based on staff interview and record review, the facility failed to ensure that residents who are trauma survivors receive trauma informed care that mitigates triggers that may re-traumatize residents for 2 of 4 residents (Resident #10 and #71). Findings Include:</p> <p>1. Per interview on 11/6/24 at approximately 2:00 PM, Resident #10 stated that s/he has had bad experiences in his/her past that get brought up when other residents say sexual things.</p> <p>Per record review, Resident #10's care plan reads, The resident has a psychosocial wellbeing problem r/t [related to] trauma of children molested by [spouse]. No triggers recorded ., revised 6/18/24, and Resident is at risk for re-traumatization R/T history of past life trauma ., revised on 9/17/2024. Resident #10's care plan does not include any identified triggers.</p> <p>Facility policy titled Trauma Informed Care, last reviewed on 7/18/23 reads, [NAME] will identify triggers which may re-traumatize residents with a history of trauma. Trigger-specific interventions will identify ways to decrease the resident's exposure to triggers which re-traumatize the resident, as well as identify ways to mitigate or decrease the effect of the trigger on the resident, and will be added to the residents care plan.</p> <p>Per interview on 11/06/24 at 1:42 PM with a Social Service Staff, s/he confirmed that Resident #10 does not have triggers identified in his/her care plan about her trauma. At 4:16 PM, the Social Service Staff explained that just looking at specific residents is a trigger for Resident #10.</p> <p>2. Per record review, Resident #71's care plan reads, Resident is at risk for re-traumatization [related to] history of Natural and human caused disasters, Accidents, War, Physical and emotional abuse. [Resident #71] voiced [s/he] was hit with a German beer bottle and in lots of fights when [s/he] was in the Army due to [his/her] size, revised 5/23/24. Interventions include Respond to resident identified triggers that prompt anxiety or symptoms and modify care/environment as needed, initiated on 5/13/2024, and Social services to initiate referral as appropriate to manage triggers, initiated on 5/13/2024. Resident #71's care plan does not include any identified triggers.</p> <p>Per interview on 11/6/24 at 9:36 AM, a Social Service Staff confirmed that Resident #71 does not have identified triggers in their care plan and a referral for therapy support has not been put in.</p>

<p>F 0943</p> <p>Level of Harm - Potential for minimal harm</p> <p>Residents Affected - Many</p>	<p>Give their staff education on dementia care, and what abuse, neglect, and exploitation are; and how to report abuse, neglect, and exploitation.</p> <p>46135</p> <p>Based on interviews and record review, the facility failed to develop and implement an effective abuse, neglect, exploitation, misappropriation of resident property, and dementia management training program for all staff. Findings include:</p> <p>A review of all educational materials used to train staff on abuse, neglect, exploitation, misappropriation of resident property, and dementia management was reviewed while investigating allegations of abuse. The materials provided included a power point titled Preventing & Reporting Resident Abuse, Misappropriation, Exploitation, and Neglect (AMEN) and another power point titled Abuse and Neglect. These training materials do not include:</p> <ul style="list-style-type: none"> - Recognizing signs of abuse, neglect, exploitation and misappropriation of resident property, such as physical or psychosocial indicators; - Understanding behavioral symptoms of residents that may increase the risk of abuse and neglect and how to respond. <p>While the training does include definitions of abuse, neglect, exploitation, and misappropriation of resident property, the training materials do not include:</p> <ul style="list-style-type: none"> - Identifying behavior constituting abuse (including sexual, physical, and mental abuse), neglect, exploitation, and misappropriation of resident property. <p>Per interview on 11/5/24 at 10:32 AM, the Nurse Educator confirmed that the materials reviewed were in totality and had no additional educational materials that would include the above topics.</p>
