

STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION	(X1) PROVIDER/SUPPLIER/CLIA IDENTIFICATION NUMBER:  555164	(X2) MULTIPLE CONSTRUCTION A. Building B. Wing	(X3) DATE SURVEY COMPLETED  11/18/2025
NAME OF PROVIDER OR SUPPLIER  Arbor Rehabilitation & Nursing Center		STREET ADDRESS, CITY, STATE, ZIP CODE  900 North Church Street Lodi, CA 95240	

For information on the nursing home's plan to correct this deficiency, please contact the nursing home or the state survey agency.

(X4) ID PREFIX TAG	SUMMARY STATEMENT OF DEFICIENCIES (Each deficiency must be preceded by full regulatory or LSC identifying information)
<p>F 0656</p> <p>Level of Harm - Minimal harm or potential for actual harm</p> <p>Residents Affected - Few</p>	<p>Develop and implement a complete care plan that meets all the resident's needs, with timetables and actions that can be measured.</p> <p>Based on observation, interview, and record review failed to implement a comprehensive care plan (a guide that healthcare workers used to ensure residents receive tailored care to meet individual needs and goals) for one of four sampled residents (Resident 1) when Resident 1 did not have water available within reach. This failure placed Resident 1 at risk for dehydration (a condition where your body loses more fluids than it takes in, meaning it doesn't have enough water to perform its normal functions). Findings: During a review of Resident 1's clinical record titled, admission RECORD, the record indicated Resident 1 was admitted to the facility with a diagnosis of dehydration, acute kidney failure (when the kidneys suddenly stop working well and can't clean waste from your blood, balance fluids, or regulate electrolytes), and essential hypertension (high blood pressure- which can damage kidneys). A record review of Resident 1's clinical record titled, Minimum Data Set (MDS, an assessment tool used to generate a plan of care) . Section GG - functional status, dated 11/5/25, indicated there was impairment on one side of the upper extremity (shoulder, elbow, wrist, hand). A review of Resident 1's clinical record titled, Order Summary Report, dated 11/18/25, the order summary indicated, . Triamterene &amp; Hydrochlorothiazide [a combination of two diuretic medications to assist the body of eliminating excess salt and potassium from the body, and increase urine flow, which reduces blood pressure] . 1 tablet by mouth one time a day. A review of Resident 1's dehydration care plan (a guide that healthcare workers used to ensure Resident 1 received tailored care to meet individual needs and goals), the care plan indicated, . offer and encourage snack/fluids between meals. During a concurrent observation and interview on 11/18/25 at 9:15 a.m., with Resident 1, Resident 1 was observed in bed, and his water pitcher was on the dresser to the left of Resident 1's side of the bed and the straw was still wrapped in the paper wrapping. Resident 1 stated he could not reach his water pitcher. During a concurrent observation and interview on 11/18/25 at 1:55 p.m., with Licensed Nurse (LN) 1, LN 1 verified Resident 1's water pitcher was on the dresser out of Resident 1's reach. LN 1 stated that he was on diuretic medications (drugs that help kidneys remove extra salt and water from the body via urine output) and he was at risk for dehydration. During an interview on 11/18/25 at 2:45 p.m., with the Assistant Director of Nursing (ADON), the ADON stated it was her expectation for Resident 1 to have the water within reach. ADON further stated all of the residents should have water within reach as long as they do not have any fluid restrictions (when too much water would cause harm to the resident due to their diagnosis) or any contraindications (a physician's order for no fluid because of upcoming medical procedure). During a review of the facility's policy and procedure (P&amp;P) titled, Hydration the P&amp;P indicated, . the facility offers each resident sufficient fluid, including water and other liquids. to maintain proper hydration and health. ensure beverages are available and within reach.</p>

Any deficiency statement ending with an asterisk (\*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
